Naga apex body cancels release of 14 Kuki civilians

IMPHAL/SENAPATI, June 1: The apex body of Naga tribes in Manipur on Monday cancelled the scheduled release of 14 Kuki civilians following disagreements with certain youth leaders and stakeholders of the tribal community.

In a statement, the United Naga Council said, "Considering the prevailing sentiments of the Naga public, the proposed release of the 14 Kuki detainees, earlier scheduled at 2 pm on June 1, hereby stands cancelled.

The 14 Kuki civilians were detained and taken hostage on May 13 and were scheduled to be released on Monday afternoon before being taken to Kangpokpi district for a reception programme.

The decision to facilitate their release triggered resentment among some Naga youth groups and civil society organisations, which alleged that the move had been taken without adequate consultation with stakeholders in the Naga-majority district, officials said.

Multiple meetings were held among the Naga civil society organisations (CONTD. ON PAGE 2)

AASU leader killed in machete attack • Deceased's kin undergoing treatment at GMCH under critical condition

Police kill prime accused in encounter

HT Bureau
GUWAHATI, June 1: A 19-year-old All Assam Students' Union (AASU) leader was killed and his cousin sister critically injured in a machete attack in Assam's Nalbari district, while the prime accused later died during a police encounter after allegedly attempting to flee custody, officials said.

The incident occurred near Gangapur under Mukalmua Police Station on Sunday evening when Madhurjya Barman and his cousin Mridumudra Deka were returning home on a scooter after visiting Nalbari town.

Police said the duo was allegedly attacked with a machete by the accused, identified as Roz Ali, also known as Ashik Ali.

Barman, who served as assistant secretary of the Paschim Nalbari Aanchalik Satra Santha, sustained severe head and neck injuries and was declared dead at Nalbari Medical College and Hospital.

Former AASU leader Late Madhurjya Barman. (File Photo)

Deka, a Class XI student, suffered grievous injuries and is undergoing treatment at Gauhati Medical College and Hospital (GMCH).

According to police, the attack was allegedly linked to a rejected

marriage proposal. Investigators said the accused had proposed to the girl several years ago, but she declined.

Police sources claimed he had earlier threatened her after the proposal was rejected. Following the incident, police

launched a manhunt and tracked the accused to a riverine island in Mukalmua.

Nalbari Superintendent of Police Bibekananda Das said the accused was apprehended and later taken to recover the weapon used in the crime.

During the operation, he allegedly snatched a self-loading rifle from a police personnel and fired at the police team.

Security personnel retaliated, injuring him in the chest. He was rushed to hospital, where doctors declared him dead.

The incident sparked widespread outrage across the district.

Members of the All Assam Students' Union staged protest demonstrations in Nalbari demanding justice for the deceased student leader. You can expand the MLA portion like this:

Healthcare, sports, energy dominate discussions

Himanta meets several union ministers, Vice-President of India in Delhi

NEW DELHI/GUWAHATI, June 1: Chief Minister Himanta Biswa Sarma on Monday held a series of meetings with senior Union ministers and the Vice President of India in New Delhi, discussing key aspects of Assam's development agenda, including healthcare expansion, sports infrastructure, energy exploration, trade opportunities and the tea industry.

During his meeting with Union Health Minister J P Nadda, Sarma sought guidance and support for the implementation of several ambitious healthcare initiatives being undertaken by the state government.

Discussions focused on the establishment of new medical colleges, expansion of MBBS seats, introduction of advanced treatment facilities such as proton beam therapy and efforts to position Assam as a major hub for medical tourism.

The Chief Minister also acknowledged Nadda's role in strengthening the BJP organisation in Assam and contributing to the party's electoral growth in the state.

Sarma also called on Vice President C P Radhakrishnan and briefed him on Assam's growth trajectory and ongoing development initiatives.

Describing the Vice President as a source of inspiration and guidance, Sarma said he looked forward to continued support in the state's journey towards building a "Viksit Assam".

The Chief Minister later met Union Minister for Petroleum and Natural Gas Hardeep Singh Puri and discussed strategies to expand hydrocarbon exploration and increase energy production in Assam.

The two leaders reviewed the state's potential in the energy sector and explored ways to enhance Assam's contribution to India's economic growth through increased exploration and production activities.

In another meeting, Sarma held discussions with Union Commerce and Industry Minister Piyush Goyal on the opportunities arising from India's recent Free Trade Agreements.

The Chief Minister said the agreements could create new avenues for entrepreneurs, farmers and small businesses in Assam.

The meeting also focused on issues affecting the tea industry and measures to strengthen the sector.

Sarma also met Union Minister for Youth Affairs and Sports and Labour and Employment Manu Kh Mundaviya, (CONTD. ON PAGE 2)

Assam govt suspends distribution of ration items for two months due to interim budget

GUWAHATI, June 1: The Assam government on Monday announced a two-month suspension of the distribution of subsidised pulses, sugar and salt under the public distribution system due to the continuation of the vote-on-account budget following the recent assembly elections.

In an advertisement published in newspapers, the food, public distribution and consumer affairs department said supplying the three food items, which were being given to eligible people at subsidised prices, has been stopped for two months with effect from June.

The department said the state is currently operating under a vote-on-account budget and the full budget for 2026-27 will be presented by the new government in July.

"The new government will present a full budget in July, and after

its passage, the scheme will restart from August," it added.

However, distribution of monthly free rice will continue uninterrupted during this period.

The government said if some shops have leftover Masoor dal, sugar and salt after distribution in May, those will be given to poor families this month.

Presenting the interim budget in February ahead of the assembly elections, then Finance Minister Ajanta Neog had sought a vote-on-account of Rs 62,294.78 crore to enable the government to meet expenditure on essential services pending the presentation of the full budget.

She had said securing the basic right to food, the government covered 70.71 lakh families and provided free rice to over 2.49 crore citizens under the NFSA and PM Garib Kalyan Anna Yojana. (PTI)

Congress initiated process to review the poll debacle: Jakir Hussain

Staff Reporter
GUWAHATI, June 1: Congress MLA Jakir Hussain Sikdar on Monday said the party has initiated an internal review process to analyse the reasons behind its defeat in the recent elections, adding that observers appointed by the party are collecting detailed feedback from leaders and workers at the constituency level.

Speaking to reporters here, Sikdar said discussions are currently underway within the party to understand the factors that contributed to the electoral setback and assess the performance of candidates in different constituencies.

"Whether we lose or win, there is always a need for review and analysis. The Congress party has sent observers to various constituencies to understand what exactly happened during the

elections," the MLA said.

According to Sikdar, the observers are interacting with Congress workers, office-bearers and local leaders to gather inputs on how the elections were conducted and how candidates performed on the ground. "They are discussing several issues such as how the election campaign was managed, what the expectations were, how many votes the candidates received, why people voted for us or why they did not support us," he said.

Sikdar stated that the observers would prepare detailed reports based on the feedback collected from different constituencies, and those reports would later be discussed within the party organisation.

"At the end of these discussions, the observers will submit a report. The Congress party will hold discussions on the basis of

those reports, and only then can we properly understand why we lost the elections," he added.

The Congress MLA also maintained that it would be premature to draw conclusions before the entire review process is completed.

"Right now, different people are expressing different opinions. It is not possible to say anything conclusively at this stage. We have to wait for all the reports and complete information to come in," Sikdar said.

He further said that the party leadership would hold internal discussions after receiving the reports to identify shortcomings and take corrective measures for the future.

The grand old party suffered a crushing defeat in the recently concluded assembly poll with the Congress ended up winning only 19 assembly seats—its lowest ever tally in Assam.

India-Oman FTA comes into force; textiles, engg, gems, jewellery get duty-free access

NEW DELHI, June 1: The free trade agreement between India and Oman came into force on Monday, giving duty-free access to 99 per cent of India's exports, including textiles, engineering, gems and jewellery, to the Omani market and benefiting professionals with enhanced mobility provisions.

On the other hand, Indian consumers would get cheaper Omani dates as imports of the fruit will enjoy quota-based duty concessions under the agreement.

The implementation of the comprehensive economic partnership agreement (CEPA) is a key development as Indian exporters are facing difficulties in shipping goods to the Gulf nation due to the US-Iran war.

The six Gulf nations are Oman, Bahrain, Kuwait, Qatar, Saudi Arabia and UAE.

India has granted duty concessions on 77.79 per cent of its total

tariff lines (12,556), which covers 94.81 per cent of India's imports from Oman by value.

For products of export interest to Oman and those sensitive to India, the offer is mostly a tariff-rate quota (TRQ) based tariff liberalisation, which includes products like dates, marbles and petrochemical items.

The Comprehensive Economic Partnership Agreement (CEPA) provides duty-free access for 99.38 per cent of India's exports to Oman by value, covering 98.08 per cent of Oman's tariff lines.

To mark the entry into force, the first consignments availing preferential tariff benefits under the agreement, including agriculture and gems and jewellery exports from Mumbai, Kolkata and Chennai, were flagged off.

"With 99.38 per cent of India's exports receiving duty-free access, the agreement unlocks new opportunities for our exporters and pro-

professionals to gain opportunities. Oman is our trusted partner, a bridge for our people and a gateway to the Gulf and East Africa," Commerce and Industry Minister Piyush Goyal said on Monday.

By delivering significant benefits to labour-intensive sectors, the pact will support job creation, drive investment and enable Indian enterprises to compete on an equal footing with suppliers from countries enjoying preferential market access, he said.

Bilateral trade between India and Oman reached USD 11.18 billion in FY 2025-26, up from USD 10.61 billion in FY 2024-25.

The minister added that the agreement is expected to significantly boost MSMEs, manufacturing and employment by enhancing competitiveness in labour-intensive sectors such as gems and jewellery, textiles, leather, footwear, marine products, engineering goods, (CONTD. ON PAGE 2)

Myanmar assures India its territory won't be used against New Delhi's security interests

NEW DELHI, June 1: Myanmar President U Min Aung Hlaing assured Prime Minister Narendra Modi on Monday that Myanmar territory would not be allowed to use against India's security interests, as the two leaders held wide-ranging talks to boost bilateral ties in trade, defence, and energy.

Aung Hlaing is on a five-day trip to India. The visit comes less than two months after he became the president following Myanmar's parliamentary elections.

The elections were held in December and January after years of protests against the ruling military-junta that seized power in a coup on February 1, 2021 overthrowing the democratically elected government of Aung San Suu Kyi.

Foreign Secretary Vikram Misri, responding to a question on Suu Kyi, said the prime minister did raise the issue with the visiting president, and that the discussion was largely in the context of the peace process that has been underway in Myanmar.

Explaining India's consistent position on the issue, the foreign secretary added that India has been supporting enduring peace, inclusion, and the need to have all stakeholders at the table.

"It was a bit of a free-wheeling discussion. I should underline that our engagement with Myanmar is not intended to be a commentary on the internal political arrangement in that country," he said.

Misri said the talks between the two sides focused on the entire gamut of bilateral issues that included trade and economic ties, defence and security related issues, border management, development assistance (CONTD. ON PAGE 2)

CM condoles singer Suman Kalyanpur's death

GUWAHATI, June 1: Chief Minister Himanta Biswa Sarma on Monday condoled the death of singer Suman Kalyanpur and said her songs were a cherished part of the golden era of Indian music.

Kalyanpur died in Mumbai on Sunday due to old age-related issues. She was 89.

"Na tum hamein jaano, na hum tumhe jaane", yet generations came to know and love Suman Kalyanpur ji through her timeless melodies," Sarma said in a post on X.

"I'm deeply saddened by her passing. Her songs were a cherished part of the golden era of Indian music, bringing joy and nostalgia to millions," he said.

Though an era comes to a close, her melodies will continue to live on, the CM added.

Kalyanpur gained popularity with her melodious voice between the 1960s and 1970s. She managed to create a niche for herself alongside the top (CONTD. ON PAGE 2)

Writers, literary organisations and admirers pay tribute to celebrated novelist and scribe Lummer Dai remembered on 86th birth anniv at Pasighat

HT Correspondent
PASIGHAT, June 1: The 86th birth anniversary of noted novelist, writer and journalist Lummer Dai was observed with solemnity and reverence at Pasighat on Monday.

The commemorative programme was organised by the Adi Agom Kébang (AAK) in collaboration with literary enthusiasts and admirers of the late literary icon.

Members of AAK, led by president Bodong Yirang and adviser Kaling Borang, along with representatives of the Arunachal Pradesh Literary Society (APLS), Pasighat Unit, and the Asam Sahitya Sabha, paid floral tributes to the late writer.

As a mark of respect, participants garlanded his effigy while patriotic and cultural songs in Adi

and Assamese were played, creating a nostalgic atmosphere during the observance.

Speakers at the programme recalled Lummer Dai's immense contribution to literature and jour-

nalism, noting that he remains one of Arunachal Pradesh's most celebrated literary figures.

Through his writings in Assamese, he vividly portrayed the culture, traditions and social realities of the people of Northeast India, leaving behind a rich literary legacy.

More than three dozen people attended the event and offered floral tributes.

Among those present were Tagom Darang, Kaling Dai, noted writer Nini Pertin, literary enthusiasts, intellectuals and members of civil society.

The gathering remembered Lummer Dai's enduring contributions to literature and reaffirmed the importance of preserving and promoting the literary heritage he championed throughout his life.

Stakeholders discuss sustainable tourism roadmap for Darak

HT Correspondent
DARAK, June 1: A one-day public and stakeholders' consultative meeting on the theme "Tourism in Darak: Prospects, Challenges, Initiatives So Far and Way Forward" was organised by the Darak Tourism and Social Welfare Foundation (DTSWF) at the Community Hall in Darak, West Siang district of Arunachal Pradesh, on May 30.

An official statement issued on Monday said that the programme aimed to gather public feedback, facilitate policy discussions and highlight initiatives undertaken by the NGO to promote sustainable tourism, environmental conservation and socio-economic development in the region.

Welcoming the participants, Jummo Potom outlined the organisation's activities and stressed the long-term importance of tourism, nature conservation, wildlife protection and community development in Darak.

Participants deliberated on a wide range of issues, including nature and wildlife conservation, responsible tourism and hospitality practices, research and documentation of local flora and fauna, beautification drives, promotion of homestays and farm stays, and the use of Google mapping and GPS technology for tourism sites

and public locations. Other key proposals discussed included the establishment of an Orchid Sanctuary-cum-Botanical Garden, promotion of eco-tourism and community conservation areas, fish conservation and sustainable angling activities, and the introduction of a "Green School" concept at the Government Secondary School, Darak, to encourage environmental awareness among students.

The meeting also endorsed the adoption of the United Nations Sustainable Development Goals (SDGs) framework to support the socio-economic development of the area.

The event witnessed participation from homestay operators, members of the Darak Mahila Samiti, farmers' clubs, self-help groups, youth and students, Panchayat leaders, Gaon Burahs, government officials, community-based organisations, market committee members and retired government employees.

The programme concluded with a vote of thanks delivered by Poknanda Raksap.

Following the meeting, Jummo Potom planted a Fox-tail Orchid (*Rhynchostylis retusa*), the state flower of Arunachal Pradesh, in Darak town as a symbolic launch of an awareness campaign (CONTD. ON PAGE 2)

Most aspects finalised in trade pact with US; talks now focus on minor issues, commas, full stops: Goyal

NEW DELHI, June 1: Commerce and Industry Minister Piyush Goyal on Monday said India and the US have finalised most elements of the first phase of the bilateral trade agreement, and negotiations are now focused on a few minor issues, "commas and full stops".

He said that the US team is here to hold talks on finalising the first phase of the bilateral trade agreement (BTA).

The talks will take place here from June 2-4. On February 3, both sides announced the framework for the first phase of the BTA.

"...mostly everything is finalised. As you know, US Ambassador George said that 99 per cent of the things have been finalised. Discussions are going on about small issues, commas and full stops.

"While finalising, how will the legal changes that have taken place in the US be reflected in the final agreement, and what kind of changes will be made accordingly. After finalising that, I am fully confident that, with the US, we will conclude the first tranche of the BTA as soon as possible, sign it and start further discussions on how to have a more comprehensive BTA," he told reporters here.

The US team will be led by its chief negotiator Brendan Lynch, India's chief negotiator Darpan Jain is an additional secretary in the Department of Commerce.

The two sides are "proposed to finalise the details of the interim agreement and take forward the negotiations under the broader BTA on multiple areas, such as market access, non-tariff measures, customs and trade facilitation, investment promotion, and economic security alignment", the commerce ministry has said.

On February 7, India and the US issued a joint statement finalising the contours or framework of the first phase of the bilateral trade agreement (BTA) or an interim trade agreement. Now, both sides will have to finalise the legal text for that deal.

The framework reaffirmed the countries' com-

mitment to the broader India-US BTA negotiations.

According to that framework, the US had agreed to reduce tariffs on India to 18 per cent from 50 per cent. It had removed the 25 per cent tariffs on Indian goods for buying Russian oil and was to cut the remaining 25 per cent to 18 per cent under the pact.

But, on February 20 this year, the US Supreme Court ruled against President Donald Trump's sweeping reciprocal tariffs, which were imposed under the 1977 International Emergency Economic Powers Act (IEEPA).

After that, the US President announced the imposition of 10 per cent tariffs on all countries for 150 days, starting February 24. It would end on July 23.

In light of these changes, a meeting between the chief negotiators of India and the US scheduled for February was postponed. The two sides then met in Washington in April, when the Indian team, headed by Jain, visited America from April 20-23, 2026.

To carry forward those discussions, the US team is visiting India this week.

As the tariff landscape has changed in the US, both sides may wish to revisit the agreement's framework.

Under the agreed framework, India proposed to eliminate or reduce tariffs on all US industrial goods and a wide range of US food and agricultural products, including dried distillers' grains (DDGs), red sorghum for animal feed, tree nuts,

fresh and processed fruit, soybean oil, wine and spirits, and additional products.

New Delhi has also expressed its intentions to purchase USD 500 billion of US energy products, aircraft and aircraft parts, precious metals, technology products, and coking coal over the next five years.

This meeting will be important, as India enjoys a comparative advantage over its competitor countries. Now, with all US trading partners facing a uniform 10 per cent tariff, the pact requires recalibration.

Sources said it is important that India should get an advantage over its competitor nations on the tariff front in the trade pact with the US. India's competitors include Southeast Asian nations, Bangladesh, Pakistan, and Sri Lanka.

"The issue would come during this week's meeting," they said, adding that US Trade Representative Jamieson Greer would also visit India later, once "we have more clarity on the issues and the findings of the Section 301 investigations".

The US can impose any tariff rate under these investigations on its trading partners.

Further, in March, the US Trade Representative (USTR) also launched two unilateral Section 301 investigations against a number of countries, including India, over excess capacity and failures to eradicate forced labour in global supply chains.

India has strongly rejected allegations made by the US Trade Representative in those two investigations and has requested that the probes be initiated, as the initiation notice has failed to provide a cogent rationale to substantiate the claims.

The US was the second-largest trading partner of India in 2025-26. India's outbound shipments to the US grew marginally 0.92 per cent to USD 87.3 billion during the last fiscal year, while imports increased 15.95 per cent to USD 52.9 billion. The trade surplus declined to USD 34.4 billion in 2025-26 from USD 40.89 billion in 2024-25. (PTI)

National CA students' conference concludes in Guwahati

HT Bureau

GUWAHATI, June 1: The two-day National Conference for CA Students, titled Metaballo Vista 2026, concluded successfully in Guwahati on Sunday after bringing together aspiring chartered accountants from across the country for academic discussions, skill development and professional networking.

The conference was organised by the Board of Studies (Operations) of the Institute of Chartered Accountants of India (ICAI) and hosted by the Guwahati Branch of the Eastern India Regional Council (EIRC) of ICAI and the Guwahati Branch of EICASA.

Welcoming the delegates at the inaugural session, Nikita Bagaria unveiled the conference theme, Metaballo Vista. Assam MLA Vijay Gupta attended the opening session and extended his best wishes for the success of the event.

The inaugural programme was also attended by Rajesh Sharma, Anjani Kumar Mundhra and other dignitaries.

The conference featured four knowledge sessions covering Accounting and Audit, Artificial Intelligence and Technology, Taxation, and Capital Markets. The sessions were chaired by experts including Mrityunjay Acharjee, Pankaj Jain, Purshotam Gaggar and Jay Chhaira.

In addition to technical sessions, the programme in-

cluded several "Skill-Up" sessions focusing on articulation, leadership development, future career opportunities, public services and personal growth, aimed at preparing students for professional challenges and diverse career paths.

A special interactive session with the Board of Studies (Operations), ICAI, was also held, allowing students to engage directly with senior members of the profession.

The paper presentation competition formed a major highlight of the conference. The presentations were evaluated by judges Bikash Agarwal and Ankit Jallan, with the top three presenters being honoured during the valedictory session.

The event was also attended by Mayur Agarwal, who motivated the students and encouraged them to pursue excellence in the profession.

Guwahati Branch Secretary Piyush Birmiwali said the conference provided an excellent platform for the exchange of knowledge and ideas among CA students, while Jay Prakash Gupta described it as one of the institute's flagship events.

The conference concluded in the presence of delegates, ICAI council members, office-bearers and members of the organising team, marking the successful culmination of Metaballo Vista 2026.

Augmont rolls out AI-enabled gold purity testing machine in Chennai

NEW DELHI, June 1: Augmont on Monday launched an AI-powered gold purity evaluation machine at its branch in Chennai, enabling customers to instantly assess the purity and indicative value of their gold ornaments.

The machine uses advanced robotic and artificial intelligence-based technology to offer a transparent, non-invasive assessment of gold before customers opt for loans, sale or recycling, the Mumbai-based Augmont said in a statement.

The facility has been integrated with Augmont's gold loan technology platform, allowing eligible customers to proceed with the loan process immediately after evaluation.

Gold continues to remain one of the most trusted financial assets for Indian households. However, gold evaluation has traditionally remained a process dependent on manual assessment and customer trust.

Ketan Kothari, Whole Time Director of Augmont, said: "We wanted to introduce an innovation that directly enhances customer confidence and decision-making."

Chennai is an important market for us, and this pilot launch will help us better understand consumer adoption and behaviour, he added. (PTI)

Commercial LPG prices hiked by ₹ 42, 5-kg LPG up ₹ 11

NEW DELHI, June 1: Prices of

commercial LPG - the one used in hotels and restaurants - as well as 5-kg market-priced LPG cylinders were on Monday hiked in line with global benchmarks, but rates of cooking gas used in household kitchens were kept unchanged.

The price of commercial LPG was hiked by ₹ 42 to ₹ 3,113.50 per 19-kg cylinder from ₹ 3,071.50 in Delhi, industry sources said.

The latest increase follows a sharp ₹ 993 hike implemented on May 1, taking commercial LPG prices to their highest-ever levels.

Prices of 5-kg free-trade LPG (FTL) cylinders were also increased by ₹ 11 to ₹ 821.50 per cylinder.

Household consumers were spared any increase, with the price of the 14.2-kg domestic LPG cylinder remaining unchanged at ₹ 913 since early March, when rates were

increased by ₹ 60 per bottle.

The revisions are part of the monthly price review undertaken by state-owned oil marketing companies. Prices vary from state to state depending on the incidence of local taxes, such as VAT.

While commercial LPG prices have climbed to record highs, household cooking gas rates have remained unchanged despite a sharp rise in import costs, underscoring the government's efforts to shield consumers from global energy volatility, government sources said. The cost of supplying a 14.2-kg domestic LPG cylinder has risen by about two-fifths in recent months, driven largely by a surge in international benchmark prices. Yet retail prices for households have remained frozen.

For beneficiaries of the government's flagship Ujjwala scheme, the gap is even wider. A domestic

LPG cylinder that costs roughly ₹ 1,200 to supply is available to Ujjwala consumers at an effective price of ₹ 613 after the ₹ 300-per-cylinder direct benefit transfer subsidy, according to government estimates. The increase in supply costs has been fuelled by a sharp rise in the Saudi Contract Price (CP) for propane, the benchmark used for India's LPG imports. Saudi CP jumped 38 per cent in April after disruptions around the Strait of Hormuz tightened Gulf supplies, according to industry data.

Despite the rise in global prices, India's household LPG rates remain among the lowest in the region, according to government sources. Both subsidised and non-subsidised domestic cylinders are priced below comparable cooking gas cylinders in neighbouring countries, although cylinder sizes vary across markets. (PTI)

per cent of the import value on full phase-out of free allowances under the ETS (Emission Trading System).

During his visit to London in 2025, Commerce and Industry Minister Piyush Goyal flagged concerns over this tax and conveyed that India may consider retaliation if the UK goes ahead with the plan.

India's exports of iron and steel and their products to the UK stood at USD 893.4 million in 2025-26, accounting for a significant share of USD 13.4 billion in total merchandise exports to the UK.

Sources also said that India could consider re-balancing the UK's steel issue with British scotch concessions, offered by India in the CETA.

As per the pact, India has announced reducing the duty on UK whisky and gin from 150 per cent to 75 per cent and further to 40 per cent in the 10th year of the deal.

In India, Scotch whisky brands such as Johnnie Walker, Chivas Regal, and The Glenlivet are the most popular. Among these, Johnnie Walker is one of the best-selling Scotches here. (PTI)

Police kill prime

minister Jayanta Mallabaruah visited the injured girl at Gauhati Medical College and Hospital (GMCH) and reviewed her condition. Speaking to reporters, he said the victim had shown signs of improvement but remained in a critical condition due to excessive blood loss.

He informed that arrangements were being made to ensure the availability of blood and all necessary medical support for her treatment.

Describing the incident as deeply shocking and unprecedented in the district, Mallabaruah said it had created concern and fear among the people of Nalbari.

He praised Assam Police for their swift response in tracking down the accused and stated that the main accused was neutralised after allegedly trying to attack police personnel during the operation.

The MLA said police were also investigating whether any other individuals had directly or indirectly aided the accused.

Referring to allegations surrounding the motive behind the attack, he asserted that the state government would continue to take a strict stand against such incidents and ensure that those involved are brought to justice.

He further assured that the Assam government would bear all medical expenses of the injured girl and extend every possible assistance to her family during this difficult period.

Police said investigations are continuing to establish the full sequence of events and determine whether others played any role in the attack. (With inputs from PTI)

Naga apex body

and student bodies at Senapati for hours, where it was pointed out that the fate of six Naga civilians abducted by Kuki armed groups remains unknown, officials added.

The Naga groups pointed out that the whereabouts and condition of the six youths held hostage must be first revealed by Kuki armed groups before finalising the release of the Kuki hostages.

In an earlier statement, the UNC had said that it, along with the Naga People's Organisation (NPO), Senapati, had intervened for the release of the 14 Kuki detainees held by the Naga Village Guard-Northern Command after consultations with stakeholders.

The council said the decision was influenced by appeals from the Baptist community, Naga churches, tribal bodies and organisations, as well as an assurance given by Union Home Minister Amit Shah to Nagaland Chief Minister Neiphiu Rio that the Ministry of Home Affairs would trace the abducted Naga civilians, identify those responsible and ensure legal action.

The UNC also referred to an appeal by the Manipur government and its assurance that the Suspension of Operations (SoO) ground rules would be strictly enforced, including rationalisation and relocation of camps. (PTI)

Healthcare, sports, energy

where discussions centred on strengthening sports infrastructure across Assam and enhancing welfare measures for workers.

The Chief Minister sought continued central support for the state's efforts to develop world-class sporting facilities and transform Assam into a leading sports destination in the country.

The meetings underscored the Assam government's focus on accelerating infrastructure development, improving healthcare services, promoting economic growth and expanding opportunities across key sectors as part of its long-term development vision. (PTI)

CM condoles singer

singer of the time, Lata Mangeshkar. Some of Kalyanpur's popular songs are 'Ajkal tere mere pyar ke charche', 'Na na karte pyar tumhin se', 'Tumne pukara aur hum chale aaye', and many others. (PTI)

Myanmar assures India

as well as the regional situation. Both sides expressed interest in forging closer cooperation, particularly in areas of trade and investment, health, education, energy, and critical technologies like artificial intelligence.

"The prime minister reaffirmed India's support for the sovereignty and territorial integrity of Myanmar and both sides underscored the importance of preventing the misuse of sovereign territory for activities inimical to their security interests," the foreign secretary said.

"The President of Myanmar, in particular, reiterated the assurance that Myanmar's territory would not be permitted to be used against India's security interests," he added.

Myanmar is one of India's strategic neighbours and it shares a 1,640-kilometer-long border with a number of northeastern states including militancy-hit Nagaland and Manipur.

"Overall, this visit by the Myanmar President has once again reaffirmed the shared commitment of both sides to deepen their long-standing partnership and to work together for mutual benefit, growth and prosperity in the region," Misri said.

National Security Advisor Ajit Doval on Sunday met Aung Hlaing and discussed key issues relating to bilateral ties.

The Myanmar leader is accompanied by a high-level delegation comprising several cabinet ministers, senior officials and business leaders.

Aung Hlaing was earlier scheduled to visit New Delhi to participate in the International Big Cat Alliance Summit on June 1, which has been deferred.

The Myanmar president will also travel to Mumbai on June 2 for business and industry interactions and site visits. (PTI)

India-Oman FTA

processed foods and pharmaceuticals. The labour-intensive goods were earlier facing 5 per cent duty in Muscat. Oman import duty ranges between 5-100 per cent.

Oman's strategic logistics hubs at Sohar, Duqm and Salalah provide Indian exporters enhanced access to wider GCC and East African markets.

All zero-duty concessions come into effect immediately, providing certainty and competitiveness to Indian exporters.

Earlier, under the MFN (most favoured nation) regime, only 15.33 per cent of India's exports entered Oman duty-free. With CEPA, Indian exporters gain substantial price competitiveness in Oman's nearly USD 28 billion import market.

To safeguard the interests of farmers and MSMEs, India has decided not to give any duty concessions in sectors like agricultural products, gold and silver bullion, jewellery, footwear, sports goods, scrap of many base metals, dairy products, cereals, fruits, vegetables, edible oils, oilseeds, rubber, leather, and spices.

On pharma, the pact provides binding zero-duty access for medicines, vaccines and pharmaceutical ingredients pharmaceutical ingredients including penicillins, streptomycins and tetracyclines.

Oman's pharmaceutical market was valued at USD 302.84 million in 2025 and is projected to reach USD 473.71 million by 2031 (CAGR 6.6 per cent), presenting a significant and growing opportunity for India's pharmaceutical exporters.

Products approved by the USFDA, the European Medicines Agency, the UK's Medicines and Healthcare products Regulatory Agency, and Australia's Therapeutic Goods Administration will qualify for marketing authorisation within 90 days without prior inspection and with a 270-working-day target where inspections are required.

Acceptance of GMP (Good Manufacturing Practices) and inspection reports significantly reduces compliance burdens and accelerates market entry for Indian pharmaceutical exporters.

Further Oman imported about USD 1.7 billion worth of electronics products in 2025, presenting significant opportunities for Indian manufacturers.

India's electronics exports to Oman stood at USD 146 million, a significant gap that the CEPA's full tariff certainty, covering all electronics categories including boards and cabinets, static converters and TV reception apparatus, is designed to close.

On the services sector front, Oman has offered to extend substantial commitments across a broad spectrum of sectors, including computer-related services, business and professional services, audio-visual services, research and development, education and health services.

Bilateral services trade stood at USD 863 million in 2024, with India running a surplus of USD 447 million. Oman's global services imports amounted to USD 12.52 billion, while India accounted for only 5.31 per cent of these imports, indicating significant untapped potential.

For the first time, Oman has offered wide-ranging commitments under Mode 4 (movement of skilled professionals), including a notable increase in the quota for intra-corporate transferees from 20 per cent to 50 per cent, together with a longer permitted duration of stay for contractual service suppliers - extended from the existing 90 days to two years, with the possibility of a further two-year extension.

The enhanced mobility provisions will benefit nearly 6,000 India-Oman joint ventures.

As per the deal, business visitors can stay in Oman for up to 90 days; Independent professionals for up to 180 days; Intra-Corporate Transferees (ICTs) for up to 4 years.

These provisions provide clear, legally enforceable mobility pathways for India's professional workforce. In addition, both sides have agreed to hold future discussions on the social security pact. It will provide reciprocal continuity of social security benefits and help avoid dual contributions for Indian workers and employers in Oman. This is fifth trade pact implemented in the last five years. The earlier ones include the UAE, Mauritius, EFTA, and Australia.

This is the first bilateral agreement that Oman has signed with any country since its pact with the US in 2006. Oman is the third-largest export destination for India among the GCC countries.

India-Oman bilateral trade was about USD 10.5 billion (exports USD 4 billion and imports USD 6.54 billion) in 2024-25. The pact is expected to help an additional USD 2 billion in the next 2-3 years. Nearly 7 lakh Indian nationals reside in Oman, and India receives about USD 2 billion in remittances from Oman annually.

Indian enterprises have built a strong presence in Oman, with over 6,000 establishments operating across sectors. India has received USD 615.54 million in foreign direct investment from Oman between April 2000 and September 2025. (PTI)

Stakeholders discuss

on environmental conservation and biodiversity. The initiative is being implemented as a pilot project by the Darak Biodiversity Club, a sub-organisation of DTSWF, with active community participation.

As part of the beautification campaign, DTSWF also distributed Cosmos flower seeds to various colonies of Darak township and nearby villages and launched a community cleanliness drive aimed at enhancing the area's appeal as a tourism destination.

Britain's steel safeguard, carbon tax sticking points in implementation of India-UK trade pact: Sources

NEW DELHI, June 1: India and the UK will discuss Britain's steel safeguard measure and carbon border adjustment mechanism (CBAM) on Tuesday as these issues have become a sticking point in the implementation of the bilateral free trade pact, which was signed on July 24, 2025, government sources said.

They said that India may re-balance some duty concessions on certain products like Scotch Whisky under the agreement with the UK if these issues do not get addressed.

The steel and the CBAM issues will figure prominently during the meeting between UK Secretary of State for Business and Trade Peter Kyle and Commerce and Industry Minister Piyush Goyal on June 2.

These issues have become a kind of sticking point in the implementation of the Comprehensive Economic and Trade Agreement (CETA).

From July 1, 2026, the UK will limit tariff-free steel imports, reducing overall quota volumes by 60 per cent compared to the steel safeguard measure. Any imports above these levels will then face a 50 per cent

tariff.

The measure will apply to imports of steel products that can also be made in the UK.

Earlier, Britain had safeguard measures that also imposed import quotas. The new measures reduce that quota.

The UK government in December 2023 also decided to implement its Carbon Border Adjustment Mechanism (CBAM) starting in 2027.

According to economic think tank GTRI, India's exports worth USD

775 million to the UK may be impacted due to Britain's decision to introduce a carbon tax on products like iron and steel, aluminium, fertiliser and cement, from 2027.

The UK, after the European Union (EU), will be the second economy to implement CBAM. It calls the move the import carbon pricing mechanism, and it will initially focus on sectors like iron, steel, aluminium, fertiliser, hydrogen, ceramics, glass, and cement.

This tax could range from 14-24

Eight rubber processing centres inaugurated in Karbi Anglong

Rubber Board-backed initiative aims to boost quality, productivity and income of small growers through collective processing

HT Bureau

DIPHU, June 1: In a significant boost to the rural economy of Karbi Anglong, eight Rubber Farmers Group Processing Centres (GPCs) were inaugurated on Monday at a function held at the Jirsong Asong Auditorium.

The centres, established through a collaborative initiative of the Rubber Board of India, Jirsong Asong, PIETNE Agro Foundation and local farming communities, are located at Hidim Teron, Hidipi, Japralangso, Langmili, Nilip, Puthijuri, Singhason and Upper Deigrung.

The project aims to shift small and marginal rubber growers from individual processing methods to a collective and technology-driven system, thereby improving rubber quality, productivity and market returns.

To support the initiative, the Rubber Board of India provided fi-

financial assistance of ₹40 lakh to each processing centre, while members of each GPC collectively contributed an additional ₹10 lakh.

Speaking as the chief guest, M Vasanthagesan said the centres would help overcome long-standing challenges faced by rubber growers.

"Previously, farmers processed latex individually, resulting in inconsistent quality and lower market value. These centres will enable standardised processing through modern infrastructure, ensuring better-quality rubber sheets and improved prices," he said.

Vasanthagesan also praised the contributions of Thankachan and Robin for their role in mobilising farmers and facilitating the successful implementation of the project.

Delivering the presidential address, Siju T described the GPCs as a model of community-driven development.

He said the centres would enhance productivity, strengthen quality standards, improve market integration and create long-term economic benefits for rubber growers in the region.

During the programme, financial assistance cheques of ₹40 lakh, along with keys to the newly constructed machine houses, were formally handed over to the presidents of the eight processing centres.

The event was attended by P Arumugam, Kuruvilla C, Ambili and several other officials, farmers and community leaders.

Tinsukia Division records major progress in sleeper renewal works

Over 10 km of track renewed in Moranhat-Dibrugarh section, boosting safety and operational reliability

HT Bureau

GUWAHATI, June 1: The Tinsukia Division of Northeast Frontier Railway (NFR) has achieved a significant milestone in track maintenance by completing 10.61 kilometres of Through Sleeper Renewal (TSR) work in the Moranhat-Dibrugarh section during May 2026.

The sleeper renewal work was carried out using the Track Relaying Train (TRT) machine and is among the division's notable infrastructure maintenance achievements in recent years.

According to NFR, the work was completed through the effective utilisation of 21 traffic blocks during the month, including nine night blocks.

The operation involved close coordination among multiple departments, efficient deployment of manpower and machinery, seamless shunting operations, and simultaneous execution of signalling and overhead traction works.

Railway officials said the successful completion of the project has strengthened track safety and improved operational reliability in the Moranhat-Dibrugarh section.

The renewed track infrastructure is expected to facilitate smoother train operations, enhance ride quality and improve overall passenger comfort while ensuring safer railway services.

Northeast Frontier Railway stated that the achieve-

ment reflects its continued commitment to maintaining high standards of safety, efficiency and infrastructure reliability across its network.

Students honoured for academic excellence at Lahorijan felicitation programme

HT Correspondent

BOKAJAN, June 1: The Yuva Sanstha Club of Lahorijan organised a felicitation programme recently to honour meritorious students who excelled in the Class X and Class XII examinations for the academic session 2025-26. The event, held at Lahorijan, brought together students, parents, teachers and community members to celebrate the achievements of young scholars and encourage academic excellence.

Among the dignitaries present were Sardali Bey, Heere Chetri and Sanjay Giri, along with several educators and community leaders from Lahorijan and neighbouring areas.

The programme began with the ceremonial lighting of the lamp, followed by the National Anthem. Cultural performances by members of the "Kingdom of Dance" group added colour to the event and entertained the audience. The highlight of the programme was the felicitation of students who secured top positions in the Class X and Class XII board examinations. The achievers were presented with certificates and mementoes in recognition of their academic accomplishments.

Addressing the gathering, the guests praised the students for their dedication and hard work, while stressing the importance of education in shaping individuals and society. They also commended the Yuva Sanstha Club for its efforts in motivating and supporting the youth of the region.

The programme concluded with a vote of thanks from the organisers, who expressed gratitude to the guests, volunteers and local residents for their support in making the event successful.

Former SBI officer, social worker Bharat Chandra Goswami passes away at 79

HT Correspondent

NAGAON, June 1: Bharat Chandra Goswami, former officer of the State Bank of India and noted social worker, passed away at his residence on Laokhowa Road in Nagaon town on Monday afternoon. He was 79 and had been suffering from prolonged illness.

A respected figure in Nagaon's social and cultural circles, Goswami was associated with several organisations and played a key role in the establishment of Sandipani Vidyamandir, one of the town's leading educational institutions.

He had served as Vice-President of the Nagaon Natya Samiti and as President of the Central Building Construction Department of the Assam Brahman Samaj.

A lifetime member of the Nagaon District Brahman Samaj, he made significant contributions towards the construction of its building and supported numerous social and educational initiatives.

His death cast a pall of gloom over Nagaon town and his native village, Majgaon.

Condolences poured in from various quarters, including Nagaon-Batadroba MLA Rupak Sarma, who described Goswami as

a true guardian of the town.

Tributes were also paid by former minister Girindra Kumar Baruah, MP Rakibul Hussain, Nagaon Municipal Board Chairperson Ambika Mazumdar, Vice-Chairman Simanta Bora, Nagaon Zila Sahitya Sabha president Sarat Borkatoky, and several organisations and institutions.

Goswami is survived by his wife, writer Subarna Goswami; son Debashish Goswami; daughters Aditi Goswami and Sampriti Goswami, along with grandchildren and other family members.

His last rites were performed at the Amolapatty Sarbajanim Crematorium on Monday evening in the presence of a large number of mourners.

APCB, Cotton University hold public outreach programme on waste management

HT Bureau

GUWAHATI, June 1: The Regional Office, Guwahati of the Assam Pollution Control Board (APCB), in collaboration with Cotton University, organised a public outreach programme on Monday as part of the Board's Golden Jubilee celebrations. The programme featured demonstrations of waste management technologies by e-waste and plastic waste recyclers, Material Recovery Facilities (MRFs), Common Biomedical Waste Treatment Facilities (CBWTFs), non-governmental organisations and individuals engaged in environmental conservation initiatives.

During an interaction session, Dr Amarjyoti Kashyap of Environ highlighted the importance of waste segregation at source, scientific solid waste management and decentralised composting as key measures for sustainable environmental practices.

Partha Pratim Pathak, Director of Fresh Air Waste Management Services Pvt Ltd, explained the proper disposal of sanitary waste and donated waste segregation bins to the university to support effective waste management practices on the campus.

Vice-Chancellor of Cotton University, Prof. Ramesh Chandra Deka, appreciated the initiative and stressed the need for adopting scientific methods of waste management. The programme concluded with an address by APCB Chairman Dr Arup Kumar Misra.

Organisers said the initiative aims to develop a roadmap for establishing a model "Zero-Waste Campus" through effective waste segregation, scientific processing and compliance with environmental regulations and the Solid Waste Management (SWM) Rules, 2026.

Riya Sarkar receives Yogendra Lal Choudhury Memorial Award

HT Correspondent

GOSSAIGAON, June 1: The 21st death anniversary of noted social worker and former Chairman of the Gossaigaon Town Committee, late Yogendra Lal Choudhury, was observed with solemnity and a memorial award presentation ceremony at Kamalnath Club-cum-Library in Gossaigaon on Monday.

The programme was organised jointly by the Gossaigaon Swarnadal Branch of the Assam Sahitya Sabha and the family members of the late leader.

The event began with floral tributes and ceremonial lamp-lighting before the portrait of Yogendra Lal Choudhury by newly elected Gossaigaon MLA Sobharam Basumatary.

A memorial meeting and award presentation ceremony followed, during which Basumatary recalled his association with the late Choudhury and highlighted his contributions to education, social welfare, religious activities and public life in Gossaigaon.

The annual Yogendra Lal Choudhury Memorial Award was presented to Riya Sarkar, a student of Bhaoraguri-Binyakhata Higher Secondary School, for securing the highest marks in the Higher Secondary Final Examination (Arts stream) among government educational institutions in the greater Gossaigaon subdivision.

She scored 89.20 per cent marks in the examination. Riya is the daughter of Pranesh Sarkar and Gitarani Sarkar of Mandarpara, Bhaoraguri.

The award comprised a citation, a set of books, a traditional xorai, a phulam gamosa and a cash prize of ₹5,000.

Her parents and the school's principal, Dulal Das, were also felicitated.

Addressing the gathering, Gossaigaon in-charge Sub-Divisional Officer (Civil) and Assistant Commissioner Lourembam Nelson Mangang praised the organisers and the family members for pro-

moting educational excellence through the initiative.

Sub-Divisional Police Officer Monturam Bora also spoke on the occasion.

As part of the programme, Integrated Child Development Project Officer Bhargava Ligira delivered the Yogendra Lal Choudhury Memorial Lecture on "Uncertainties of the 21st Century and the Future of Humanity".

The memorial meeting, chaired by branch president Pradip Kumar Das, was addressed by several speakers who paid tribute to the late Choudhury and his contributions to society.

Representing the family, academician Bivharani Choudhury spoke on the life and legacy of the departed leader.

The programme also featured musical performances by local artist Milakshi Kalita.

The objectives of the event were outlined by journalist Shankar Choudhury, while the vote of thanks was delivered by Shankar Chandra Das.

UPPL leader, former ABSU speaker Phanin Boro passes away

HT Correspondent

KOKRAJHAR, June 1: Noted social worker and United People's Party Liberal (UPPL) leader Phanin Boro passed away on Monday morning at a private hospital in Chirang district after a prolonged illness.

Boro, a resident of Bijni, had been undergoing treatment for several months due to health complications. He breathed his last at around 7 am.

A former speaker of the All Bodo Students Union (ABSU), Boro was widely known for his involvement in social welfare activities and his contributions to community development and social integration in the region.

At the time of his death, he was serving as president of the Bijni district committee of the United People's Party Liberal (UPPL).

As news of his demise spread, people from different communities gathered at his residence to pay their last respects.

His mortal remains were later taken to the UPPL Bijni district office, where thousands of mourners, including political leaders, social activists and well-wishers, paid tribute.

Among those who paid their respects were Rajya Sabha MP Rwnghra Narzary, Lok Sabha MP Joyanta

Basumatary, former minister Urkhao Gwra Brahma, and UPPL general secretaries Raju Kumar Narzary and Madhab Chandra Chetty.

ABSU president Khurwmdao Wary and general secretary Khanindra Basumatary also paid tribute to Boro at the ABSU office in Bijni.

Several organisations, including ABSU, Bodo Sahitya Sabha, Tribal Sangha and UPPL, expressed deep sorrow over his demise.

Expressing his condolences, Rajya Sabha MP and UPPL president Pramod Boro described Phanin Boro as a dedicated social worker and committed grassroots leader.

"The news of the untimely demise of Shri Phanin Boro, President of Bijni District UPPL, former ABSU leader, dedicated social worker and my beloved younger brother, has left me heartbroken," Pramod Boro said.

He said Phanin Boro had devoted his life to the service of society and the welfare of the people, earning the respect and affection of countless individuals through his sincerity, humility and commitment.

"Today, UPPL has lost a committed grassroots leader, society has lost a selfless worker, and I have lost a younger brother," he added while extending condolences to the bereaved family.

New Advanced Life Support ambulance at KAMCH strengthens emergency healthcare response in the district

HT Bureau

DIPHU, June 1: The 108 Mri-tyunjoy Emergency Ambulance Service has continued to play a crucial role in providing emergency medical assistance across East Karbi Anglong, benefiting 7,108 patients during the period from April 2025 to March 2026.

According to official data, the service responded to 5,223 emergency cases involving road accidents, pregnancy-related complications, respiratory illnesses, cardiac emergencies, poisoning, suicide attempts and other critical medical situations.

In addition, 1,885 patients were provided Inter-Facility Transfer (IFT) services, enabling the movement of critically ill patients between healthcare institutions for specialised treatment and advanced medical care.

District Emergency Medical Ex-

ecutive Surajeet Kalita said a new Advanced Life Support (ALS) ambulance was deployed near Karbi Anglong Medical College and Hospital on April 18 to strengthen emergency healthcare services in

the district. Equipped with advanced monitoring and life-support equipment, the ALS ambulance enables paramedics to stabilise patients suffering from severe trauma, cardiac

ATTSA, ATTWA felicitate 200 meritorious students

Career counselling programme aims to encourage educational advancement among Tea Tribes community youth

HT Correspondent

MARGHERITA, June 1: The Assam Tea Tribes Students' Association (ATTSA) and Assam Tea Tribes Women's Association (ATTWA), Margherita branch committees, jointly organised a felicitation and career counselling programme at the Margherita India Club recently.

The event honoured meritorious students from the Tea Tribes community residing in the Margherita Co-District who successfully passed the recently declared HSLC and Higher Secondary examinations.

The programme began with the hoisting of the association flag by Ananta Ghatowar, followed by a martyrs' tribute led by Manoj Tanti.

Around 200 students were felicitated during the event in recognition of their academic achievements.

Among the distinguished guests present were Assam Cabinet Minister Rameshwar Teli, ATTSA Central Executive Committee president Jagadish Baraik, ATTSA Tinsukia district president Jagat Nayak, journalist Chakrapani Parashar and Amarjit Saikia, along with several other prominent personalities and local residents.

In addition to the felicitation ceremony, students were provided with career counselling sessions aimed at helping them make informed decisions regarding their future education and career paths.

Representatives of ATTSA and ATTWA said the programme was organised with the objective of promoting education and motivating the younger generation of the Tea Tribes community to pursue higher studies and career opportunities.

Madhavdev's birth anniversary observed at Batadroba Thaan

HT Correspondent

NAGAON, June 1: The birth anniversary of Mahapurush Madhavdev was celebrated with religious fervour at Sri Sri Batadroba Thaan on Monday, following traditional Vaishnavite customs and rituals.

The observance was held at the birthplace of Srimanta Sankardev and drew a large number of devotees and Vaishnavites from different parts of Assam.

The day's programme began in the morning with the ritual of taal kobowa, followed by naam recitation by the aaisakal and khol prasanga. A special kirtan was organised later in the afternoon, attended by nearly a thousand devotees.

As part of the celebrations, the devotional composition "Krishna Surya Bhaillanta Uditaa..." and several other kirtans were performed to mark the occasion.

QUOTE OF THE DAY

Only those who will risk going too far can possibly find out how far one can go. T S Eliot

Examination fiascos

The continuing examination controversies is something far deeper than administrative failure. They expose a gap between the rhetoric of national achievement and the lived experience of millions of families who depend on public systems to secure their future. For a country where education remains the main ladder of social mobility, an examination is not merely a test. The National Testing Agency has come to symbolise this breakdown. Its purpose was to bring standardisation, efficiency and credibility to high-stakes examinations. Instead, it has repeatedly been pushed into the centre of controversy, facing judicial scrutiny, public anger and a severe loss of confidence among students. The Supreme Court's sharp observations have reflected what many families already feel: that an institution entrusted with the futures of young citizens cannot operate with casualness, opacity or a defensive bureaucratic reflex. When candidates and parents are driven to despair, when uncertainty drags on for weeks, when allegations of leaks and irregularities are answered first with denial and only later with damage control, the damage to credibility becomes difficult to repair. The disruption of the Common University Entrance Test (CUET-UG) has again exposed the fragility of India's digital exam infrastructure. A technical glitch delayed the start of the test, forcing more than 3,700 candidates to leave their centres. The NTA is already under fire after a question paper leak led to the cancellation of the May 3 NEET (National Eligibility cum Entrance Test). The matter is being probed by the CBI, while the NTA has decided to conduct the exam in the computer-based mode from next year. Another national-level academic body, the Central Board of Secondary Education (CBSE), is in a spot over the on-screen marking system. An embarrassing mix-up of answer sheets has been flagged by several students.

The CBSE controversy reinforces the same concern. What appears at first glance to be a technical failure in examination handling or evaluation cannot be dismissed as an accident if the chain of decisions reveals something more deliberate. The issue is not only that students suffered due to blurred answer sheets, missing pages, mismatched records or payment failures. The deeper issue is whether public procurement in education has been reduced to a process where eligibility conditions can be loosened, safeguards bypassed, and accountability diffused after the damage is done.

The language of accountability is used, but consequences are dispersed across committees, inquiries and procedural reviews. The human cost is severe. Students caught in these controversies are not abstract beneficiaries of a demographic dividend. They are young people living under intense psychological pressure. India often celebrates its youth population as an economic advantage, but that advantage can be squandered if the systems meant to channel aspiration instead produce mistrust.

Chinese part in Bangladesh Teesta Project alarms India

By: Nantoo Banerjee

Bangladesh's involvement of China in the country's US\$ 1.5-billion Teesta River Comprehensive Management and Restoration Project (TRCMRP) seems to have posed a significant geopolitical tension for India and its defence concerns. Dhaka made a formal request to China for the project during Foreign Minister Khalilur Rahman's recent visit to Beijing, reflecting a pivot in Bangladesh's foreign policy under its new government. And, Beijing obliged quite eagerly as it could be part of its Belt and Road Initiative (BRI) in Bangladesh. The project under Chinese technical and financial involvement has naturally heightened India's security concerns in view of its close proximity to the Siliguri Corridor, often called "Chicken's Neck", a highly sensitive, narrow strip of land connecting the Indian mainland to its eight northeastern states.

There is nothing surprising about the newly elected Bangladesh government's sudden decision to involve China in the project as a comprehensive water-sharing agreement on the Teesta has been stalled for over 15 years, largely due to opposition from the state of West Bengal, led by former Chief Minister Mamata Banerjee. Under the Indian Constitution, water is a state subject. The Centre cannot sign a binding Teesta water sharing agreement without West Bengal's consent. Mamata Banerjee blocked the deal due to domestic water scarcity, ecological concerns, and political considerations. In September 2011, then-Prime Minister Manmohan Singh and the UPA government drafted an interim treaty proposing a water division during the dry season, giving India 42.5 percent and Bangladesh 37.5 percent. Mamata Banerjee, who was initially scheduled to accompany the Prime Minister to Dhaka, skipped the trip at the last minute and refused to sign the proposed deal.

Unable to secure a pact over the years, Bangladesh shifted focus to a conservation approach, inviting foreign infrastructure bids. The TRCMRP plans to build massive reservoirs, dredge the riverbed, build embankments, and construct satellite cities to mitigate dry-season water shortages and manage monsoon floods. Although New Delhi had already submitted its own technical and conservation proposal for the Teesta basin in a bid to resolve the issue collaboratively, the new Bangladesh government has opted for its own project under Chinese collaboration. New Delhi views China's prominent involvement in the basin as a strategic security concern near its borders. India has actively offered to fund and handle the conservation project to pre-empt Chinese influence but the new Bangladesh government decided to collaborate with China.

The Teesta issue has unfolded amid broader water diplomacy concerns, including the impending expiration of the 1996 India-Bangladesh Ganges Water Treaty. Bangladesh is pushing for urgent negotiations to establish a new Ganges water-sharing treaty with India, as the current 1996 pact expires in December. Leaders from the ruling Bangladesh Nationalist Party (BNP) have formally linked the future of Dhaka's bilateral ties with New Delhi to a fair, climate-resilient water-sharing deal that meets Bangladesh's current needs. While the 30-year-old treaty established a structured mechanism for sharing dry-season flows at the Farakka Barrage, Bangladesh has frequently raised concerns that the actual water released during lean months often falls short of what was promised. On the contrary, India has maintained the issue of the release of Ganga water is addressed through established bilateral platforms, such as the ongoing joint measurements of water levels and engagement through the Joint Rivers Commission between the two countries.

While demanding renegotiations of the Ganges Water Treaty to govern the equitable sharing of dry-season water flows (January 1 to May 31) from the Ganga River between India and Bangladesh, the latter is believed to have approved a mega-project to construct a barrage on the Ganges water-fed Padma River. Bangladesh maintains this is for internal water management and mitigating dry-season salinity. The Ganga water treaty dictates water sharing at the Farakka Barrage in West Bengal based on 10-day cycles. If flows are under 70,000 cusecs, the water is divided equally (50:50). When water flows fall between 70,000 and 75,000 cusecs, Bangladesh is guaranteed 35,000 cusecs, with India receiving the remainder. (IPA Service)

The Relevance of Libraries

Libraries are an indispensable part of human civilization. In contemporary times, when the rapid expansion of digital technology has transformed the way information is accessed, questions have arisen regarding the relevance of libraries. The easy availability of the Internet, instant access to information, and the widespread use of digital media have challenged the traditional role of libraries. Nevertheless, a library is not merely a place for storing books; it is a repository of knowledge, a custodian of culture, and a vibrant center for the intellectual development of society.

The historical significance of libraries is inseparably linked with the development of civilization. Since ancient times, libraries have functioned as centers for the preservation and dissemination of knowledge. Their primary objective was to preserve the intellectual heritage of human civilization through the collection of manuscripts, written records, and accumulated knowledge. These libraries did not merely serve as storehouses of knowledge but also acted as mediums for the exchange of ideas among different cultures. In recent times, the development of digital technology has made access to information easier. Any individual can now obtain information from any corner of the world within moments while sitting at home. This transformation has placed the traditional role of libraries under scrutiny. However, the importance of libraries is not limited to being a source of information. Their significance lies in the selection, preservation, and delivery of information to readers. Although digital platforms offer an abundance of information, questions often arise regarding its reliability and depth. The books, journals, and documents preserved in libraries are generally reviewed by experts and are dependable sources of knowledge. This reliability makes libraries an island of trust amidst the vast ocean of information. Furthermore, the quiet environment of a library provides readers with the opportunity to acquire knowledge through deep concentration and reflection, something that is often difficult to achieve in the distracting atmosphere of digital media. This unique quality has ensured the continued relevance of libraries in modern times. Their role extends beyond the search for information; they are an integral part of the intellectual and cultural life of society. Libraries not only provide information but also stimulate critical thinking, analytical abilities, and creativity. Thus, the relevance of libraries remains intact even today because they continue to function as

enduring centers of knowledge.

The transformation of libraries is another important aspect of their contemporary relevance. The journey from traditional libraries to modern digital libraries represents a remarkable change. Traditional libraries primarily housed printed books, handwritten manuscripts, and periodicals. In modern times, however, libraries have adopted digital preservation systems. The availability of e-books, e-journals, online repositories, and digital databases has expanded the scope of libraries. As a result of this digitalization, accessibility has increased significantly. Digital libraries have opened new doors of knowledge for those who are unable to visit libraries physically. This transformation has enabled libraries to adapt to changing times. Yet, despite this digitalization, the importance of the intellectual heritage of human civilization has not diminished. The tactile experience of turning the pages of a book, the serene atmosphere of a library, and the intellectual connection formed among readers cannot be replicated by digital media. These sensory and emotional experiences make traditional libraries unique spaces. Moreover, libraries play an important role in fostering connections within local communities. Through cultural programs, reading circles, discussion forums, and workshops, libraries bring together people from various sections of society. Such activities make libraries not merely repositories of knowledge but also social and cultural centers. This multifaceted role has ensured their continued relevance in contemporary times. The combination of digital and traditional approaches has transformed libraries into dynamic institutions capable of adapting to the needs of the age. This evolving nature has given libraries a new dimension of importance, making them an integral part of modern society.

For students, libraries are invaluable reservoirs of knowledge. The availability of books, journals, databases, and other educational resources enables students to move beyond their prescribed curricula and explore the wider world of knowledge. Although digital platforms provide abundant information, concerns often arise regarding the reliability and depth of such information. The books and resources preserved in libraries are generally reviewed by experts, enabling students to build their knowledge on dependable foundations. This reliability makes libraries indispensable educational resources. In addition, libraries help students develop research skills, analytical thinking, and the capacity for independent

learning. These abilities are essential in modern life, as they empower students to solve complex problems and think independently. The quiet and focused environment of libraries provides opportunities for deep study, which is often difficult in the distracting environment of digital media. Furthermore, libraries enable students to gain extensive knowledge across various disciplines, thereby broadening their intellectual horizons. This educational role contributes significantly to the intellectual development of society. For students, libraries are not merely sources of information but sacred spaces for personal growth, intellectual advancement, and the cultivation of creativity. Thus, the educational function of libraries remains a fundamental pillar of their relevance in contemporary times. Libraries are open spaces for people from all sections of society. Rich and poor, educated and uneducated, young and old—all have equal access to their resources. There is no discrimination within a library, and everyone is provided with equal opportunities. Particularly for economically disadvantaged individuals, libraries serve as accessible gateways to knowledge. Through libraries, they gain opportunities to improve the quality of their lives. Libraries help reduce intellectual inequality by ensuring access to knowledge for all. Moreover, libraries play a crucial role in preserving local culture, history, and heritage. Through the preservation of books, handwritten manuscripts, and local literature, libraries serve as custodians of a society's cultural identity. This role in cultural preservation makes libraries an indispensable component of society. Libraries also promote social cohesion by connecting with local communities. Through cultural programs, reading circles, and discussion forums, they bring together people from different backgrounds. These activities transform libraries into social centers that contribute to the overall development of society. This social role continues to make libraries relevant in contemporary times, as they act as bridges connecting various dimensions of community life.

A discussion of the changing role of libraries in the digital age reveals another important aspect of their relevance. Modern libraries are no

longer merely repositories of books; they have evolved into multifunctional centers. Many libraries now provide Internet access, computer facilities, and digital databases. These services have enhanced both their accessibility and attractiveness. Furthermore, libraries actively engage with communities through educational programs, workshops, and cultural events. Such initiatives foster a greater interest in knowledge among younger generations. The integration of digital technology has expanded the role of libraries even further. Through these developments, libraries have successfully adapted to contemporary needs. This dynamism has established them as indispensable institutions in modern society. Digital libraries have enabled readers to access information from anywhere in the world, thereby breaking geographical barriers. Nevertheless, the physical presence of traditional libraries and their unique atmosphere continue to hold a special place in the minds of readers. This dual role—both digital and traditional—has made libraries even more relevant in the modern era. Their evolving nature has added new dimensions to their significance, ensuring their continued place within contemporary society.

The contribution of libraries to intellectual freedom is particularly noteworthy. Libraries preserve books representing diverse viewpoints on a wide range of subjects. As a result, readers can engage with different schools of thought and develop their analytical abilities. Digital media often presents information based on individual preferences, which can narrow perspectives. Libraries, however, are free from such limitations. The diverse collections available in libraries introduce readers to new worlds of ideas. Furthermore, libraries play a significant role in research. For researchers, writers, and analysts, libraries are invaluable resources. Their collections of rare books, manuscripts, and historical documents provide new directions for scholarly inquiry. This research-oriented role has established libraries as major centers of intellectual freedom. By exposing readers to diverse perspectives, libraries help cultivate critical thinking and independent judgment. Readers are able to form their own opinions and think independently

about various social issues. The promotion of intellectual freedom ensures the continuing relevance of libraries, as they make substantial contributions to the intellectual growth of society. Moreover, through access to knowledge, libraries provide people with opportunities to acquire new skills. These skills enable individuals to improve their quality of life and become economically self-reliant. This role is especially significant in developing countries. Libraries create educational opportunities within local communities, helping people discover new employment possibilities. In addition, libraries serve as important sources of information for entrepreneurs. They provide access to knowledge about business ideas, market trends, and technological developments. Through such information, entrepreneurs can enhance the prospects of their enterprises. This economic function makes libraries valuable social assets. By contributing to economic development, libraries continue to remain relevant in contemporary society.

Reflecting on the future of libraries provides a clear understanding of their dynamism and adaptability. As the digital age continues to evolve, the role of libraries will also change. However, their fundamental purpose—the dissemination of knowledge and the advancement of society—will remain unchanged. Libraries will continue to play a vital role in spreading knowledge. Through integration with emerging technologies, they will sustain their relevance in the future. The use of artificial intelligence, digital repositories, and online services will enable libraries to offer more personalized services to readers. Moreover, libraries will be able to organize innovative programs tailored to the needs of new generations. This adaptability will ensure their future relevance. Through their contributions to intellectual, cultural, and economic development, libraries will continue to serve society. This forward-looking vision establishes libraries as enduring assets for future generations. In conclusion, libraries remain indispensable institutions in society. Although digital technology has transformed their role, it has not diminished their importance. Libraries continue to contribute significantly to the dissemination of knowledge, social connectivity, educational advancement, cultural preservation, and economic development. Their evolving nature and integration with modern technology have enabled them to adapt successfully to contemporary needs. In the future as well, libraries will retain their significance and continue contributing to the intellectual and cultural advancement of society. Therefore, libraries are not merely legacies of the past; they are living centers of knowledge for the present and the future.

World Environment Day 2026

The Climate Crisis and Responsibilities

The continuous wildfires raging across different corners of the world, erratic storms, unseasonal rainfall, unprecedented heatwaves and the rapid melting of glaciers carry a grim and ominous warning for humanity. These natural disasters unequivocally prove that the ecosystem and balance of our only habitable planet are now under severe jeopardy. Climate change is no longer just a looming future threat, it has manifested into a harsh, cruel reality of our present, endangering the very existence of human civilization. The alarming data presented in recent climate reports by the World Meteorological Organization (WMO), NASA and the European Copernicus Climate Change Service have proven to be undeniably accurate. According to these organizations, the period between 2023 and 2025 was the hottest in recorded history. For the first time ever, the Copernicus Climate Change Service reported that global average temperatures exceeded the 1.5°C threshold for three consecutive years.

Consequently, the year 2026 has become the most critical historical juncture in global warming. Driven by unchecked carbon emissions, global temperatures are projected to permanently breach this 1.5°C limit by 2026. While the WMO has sounded alarm bells regarding the catastrophic future scale of global warming, NASA has utilized satellite data to confirm that current temperatures are the highest witnessed in the last 140 years. These terrifying statistics are not mere numbers, they are definitive indicators of a looming existential crisis for humanity and the entire biosphere. Because the global community

remained confined to empty promises, endless debates and distant targets for years, the climate crisis has today assumed an aggressive and irreversible form. To find rapid and actionable solutions to this global emergency, the world will observe the 53rd World Environment Day on June 5. Spearheaded annually by the United Nations Environment Programme (UNEP), this global event centers around a specific, timely theme. Aligning with this, the official theme for World Environment Day 2026 has been declared as "Inspired by Nature: For Climate, For Our Future." Correspondingly, the global campaign slogan for this year is "Now for Climate." This slogan makes it explicitly clear that humanity has absolutely no time to lose and whatever actions need to be taken must be executed this time.

This year, the international host city for World Environment Day is Baku, the historic capital of Azerbaijan situated on the coast of the Caspian Sea. Notably, Baku recently hosted the pivotal UN Climate Change Conference (COP29), where historic frameworks regarding global temperature caps and climate finance funds were negotiated. Having successfully organized the UN climate summit, Azerbaijan has now taken up the profound responsibility of uniting the global community to confront climate challenges arising from rapid urbanization through nature-based solutions. These alarming global statistics and acute climate emergencies are no longer confined to the discourse of developed nations or international summits, their direct and ad-

verse impacts are now starkly visible at the regional level. Our green state of Assam has not been spared by this global ecological disruption. In fact, the adverse effects of climate change have left Assam severely battered. Over the last few years, Assam's climate has exhibited highly abnormal fluctuations. The state, once celebrated for its lush hills, valleys, and equitable climate, is now plagued by the frequent recurrence of extreme conditions like droughts and hyper-precipitation.

The behavior of the mighty Brahmaputra and Barak rivers—the lifelines of Assam's economy and demographic landscape—is becoming increasingly erratic by the day. Due to global warming, the Himalayan glaciers are melting at an accelerated pace, directly impacting our river systems. Well before the arrival of the actual monsoon, even during April and May, unprecedented floods submerge vast stretches of Lower and Upper Assam. Conversely, during the peak monsoon months, rainfall drops drastically, triggering drought-like situations. This erratic weather cycle has brought severe disaster to the state's agrarian economy, profoundly affecting Assam's legendary tea industry and traditional paddy cultivation. It is not just the rainfall, the rise in Assam's average temperature has shattered all past records. Recently, temperatures in various parts of the state have touched a scorching 40°C, rendering daily life miserable. Deforestation in the hill districts, rampant river sand mining, and the filling up of local ponds and wetlands in the name of urbanization have completely destabilized the local ecosystem. Due to this shrinking forest cover, wildlife in world heritage sites like Kazi-

ranga or Manas is no longer safe. Driven by the search for food and shelter, wild animals are forced to venture into human settlements, escalating human-wildlife conflict to an intense degree.

Standing at this critical crossroads, we cannot afford to sit idly by, relying solely on government policies or international bodies. This year's slogan, "Now for Climate," reminds us that if we fail to act immediately, passing on a livable planet to future generations will become impossible. In line with this year's theme, "Inspired by Nature," we must chart our developmental paths by respecting the laws of nature. Our responsibilities can be broadly categorized into three domains: government policy, collective action, and personal awareness.

First, we must move beyond the tokenism of planting saplings on World Environment Day. We must take responsibility for nurturing those saplings until they transform into massive trees, and depleted hill slopes and riverbanks must be re-greened through both governmental and non-governmental community initiatives. Second, Assam's domestic ponds and natural wetlands are vital buffers for climate regulation and the rising trend of reclaiming these price-less wetlands for urban construction must be strictly regulated through stringent legal frameworks, alongside a renewed emphasis on rainwater harvesting and traditional irrigation methods.

Third, we must transition away from modern consumerist culture and embrace the nature-friendly, sustainable lifestyles deep-rooted in traditional Indian and Assamese societies. Single-use plastics have caused catastrophic damage to our soil and water networks and they

must be actively replaced with indigenous, biodegradable alternatives made of jute, bamboo and banana fiber. Furthermore, to curb the climate crisis, we must systematically reduce our reliance on fossil fuels and aggressively promote solar energy, wind energy, and the widespread adoption of electric vehicles.

Finally, education must become the most potent medium to transform societal mindsets. Academic scoring contests cannot remain the sole objective of education, our educational institutions must be re-molded into epicenters of environmental consciousness. Students should be taken out of the confines of classrooms into the lap of nature, fostering an intrinsic emotional bond and reverence for the environment from childhood.

Standing here in the year 2026, we must realize with every fiber of our being that human civilization has no independent existence separate from nature. Today's climate crisis is fundamentally the consequence of our unregulated greed and exploitation of natural resources. On the sacred occasion of the 53rd World Environment Day, we must not limit ourselves to slogans or speeches. Every citizen must pledge to plant and protect at least one tree, eliminate waste, and adopt an eco-friendly lifestyle. The clarion call of "Now for Climate" echoing from Baku must resonate through our villages, towns, and cities. We must remember that we do not have a "Planet B." Therefore, for our own future and to secure the safety of the generations to come, we must dedicate ourselves to protecting nature starting today—this very moment. Only then will the celebration of World Environment Day achieve its true fulfillment.

New colorectal cancer screening guidelines add blood and at-home stool tests

By: Peter Morales-Brown

Colorectal cancer is the third most common source cancer worldwide, and the second leading cause of cancer-related deaths worldwide. Early-onset colorectal cancer, which occurs in adults under 50, is rising globally at an alarming rate in younger adults, with research highlighting that it is the leading cause of cancer-related death among males and females under age 50.

Previous colorectal cancer screening guidelines from the ACS advised that average-risk adults aged 45 years and older undergo regular screening with either a stool-based test or a visual exam, based on personal preferences and test availability. It also recommends a timely colonoscopy after all positive results on non-colonoscopy screening tests.

Now, the ACS has updated its screening guidelines to expand the range of recommended screening tools, including new blood-based and at-home stool tests designed to improve participation and detect cancer earlier.

Published in *CA: A Cancer Journal for Clinicians*, the updated recommendations continue to advise that adults at average risk begin screening for colorectal cancer at age 45 and continue through age 75 and up to 85, depending on their preference and overall health. They also advise that individuals at higher risk

may need to begin screening before age 45 and undergo testing more frequently.

The revised guidance reflects growing concern over rising colorectal cancer rates among younger adults, as well as persistent screening gaps across the United States.

More screening choices aimed at increasing participation

Older evidence indicates that more than 20 million eligible Americans remain unscreened for colorectal cancer, which is approximately one-third of adults who should be tested.

Experts involved in the update suggest that expanding the number of available screening methods may help remove barriers for people who are reluctant or unable to undergo traditional colonoscopy procedures.

Notably, findings from the 2026 Colorectal Cancer Alliance State of Screening Study highlight that only half of Americans know that colorectal cancer screening tests are available at home. Screening can significantly improve survival outcomes, particularly when the disease is detected early. Evidence suggests that the 5-year survival rate can exceed 90% when colorectal cancer is diagnosed at an early stage.

By updating their guidance, the ACS hopes more eligible adults will participate in colorectal cancer screening, helping close the screening gap and catch more cancers at an earlier, treatable stage.

Robert Smith, TrustSource, PhD, Senior Vice President, Cancer Screening at the American Cancer Society, and senior author of the updated guidelines, told Medical News Today that the updated guidelines are an opportunity to reinforce the foundation of the recommendations and highlight what is new.

"Adults at average risk of colorectal cancer should begin regular screening at age 45. If they are past the age of 45 and have not started screening, it is important to do so now. Options for colorectal cancer screening include visual tests, of which the most commonly chosen is colonoscopy every 10 years, and stool tests, of which there are options for annual testing or testing every 3 years."

— Robert Smith, PhD
"With this update, we review an update of an existing multi-target stool-DNA test, which tests for blood in the stool or abnormal DNA, and a new multi-target stool-RNA test, which tests for blood in the stool and abnormal RNA fragments," Smith said.

"These two tests are recommended to be done every 3 years. We also add to the recommendations a blood-test option, which should only be recommended to individuals who decline or have not completed a high-sensitivity stool-based test or visual exam," he added.

What are the new screening options?
While colonoscopy remains the gold standard, TrustSource, PhD, Senior Vice President, Cancer Screening at the American Cancer Society, and senior author of the updated guidelines, told Medical News Today that the updated guidelines are an opportunity to reinforce the foundation of the recommendations and highlight what is new.

While colonoscopy remains the gold standard, TrustSource, PhD, Senior Vice President, Cancer Screening at the American Cancer Society, and senior author of the updated guidelines, told Medical News Today that the updated guidelines are an opportunity to reinforce the foundation of the recommendations and highlight what is new.

updated guidelines now include additional stool-based and blood-based tests.

New and updated stool-based tests

The ACS now recommends newer multitarget stool tests that analyze stool samples for molecular markers linked to colorectal cancer.

These include Cologuard, an updated multitarget stool DNA (mt-sDNA) test that checks for DNA markers and hidden blood in stool samples, and ColoSense, a newer multitarget stool RNA (mt-sRNA) test that analyzes RNA markers alongside hemoglobin in stool samples.

Both Cologuard and ColoSense have FDA approval and demonstrate high sensitivity for detecting colorectal cancer. Both tests are designed to be completed at home and are recommended every 3 years.

Blood-based screening test added

The updated recommendations also include a blood-based screening option, Shield, which detects tumor DNA circulating in the bloodstream.

However, although Shield also has FDA approval, TrustSource, PhD, Senior Vice President, Cancer Screening at the American Cancer Society, and senior author of the updated guidelines, told Medical News Today that the updated guidelines are an opportunity to reinforce the foundation of the recommendations and highlight what is new.

The ACS suggests that blood-based tests should primarily be for those who decline or do not complete preferred screening methods, such as stool testing or

colonoscopy.

Colonoscopy remains the preferred visual exam

The guideline also highlights that a positive result from any blood or stool-based screening test must be followed by a colonoscopy, ideally within 6 months, to complete the screening process. "If a non-colonoscopy colorectal cancer screening test is positive, it must be followed up with a colonoscopy, or the screening process is not complete," Smith emphasized to MNT. "It is critically important, but many patients with positive findings on a stool test do not get followed up with a colonoscopy."

"There are numerous reasons, including not appreciating the importance of the follow-up colonoscopy, difficulty getting an appointment, concerns about costs (it should be covered at no cost to individuals with insurance), the complexity of preparing for colonoscopy, the need to get time off from work, the need to arrange for a chaperone to drive the patient home from the exam, etc. Strong encouragement from the healthcare team is essential," he explained. Although new technologies are being added, the

updated recommendations continue to support traditional visual screening methods, including TrustSource colonoscopy every 10 years, flexible sigmoidoscopy every 5 years, and CT colonography every 5 years.

At-home stool tests such as fecal immunochemical tests (FIT) and guaiac-based fecal occult blood tests (gFOBT) also remain part of the recommendations.

Which test is best to screen for colorectal cancer?

The ACS reiterates that the best screening test is ultimately the one a person is willing and able to complete. "Patient preference is very important, and in fact, our guideline recommends that clinicians should not direct patients to a specific test but initially recommend that individuals consider either a visual examination or a stool test," Smith adds.

"Too often clinicians simply advise patients to get a colonoscopy, and the evidence shows that many individuals do not wish to undergo an invasive test," he said.

Improving access and affordability for colorectal cancer screening

The ACS and its advocacy affiliate, American Cancer Society

Cancer Action Network (ACS CAN), state that improving access and affordability will be critical to the success of the updated guidelines.

The screening gap for colorectal cancer remains a persistent barrier that can result in delayed diagnoses, advanced-stage tumors, and higher mortality rates that could have been avoided. The ACS CAN highlights that insurance coverage and out-of-pocket costs remain major barriers to screening participation, and they will continue to press for policies that eliminate these barriers.

The ACS also notes that the growing colorectal cancer trends in younger populations make earlier and more accessible screening increasingly important.

The guideline update also features a new patient information page that intends to help people better understand colorectal cancer screening options, prevention strategies, and follow-up care. "Clinicians should stress the burden of disease, the value of early detection for both prevention through removing polyps that may become colorectal cancer and finding colorectal cancer early," Smith concluded. (Courtesy: MNT)

India's first elderly department in Kerala will address a crisis rest of country has not recognised yet

By: K A Shaji

For decades, Kerala's migration economy transformed the state socially and economically. Remittances built houses, funded education and lifted entire families into the middle class. But beneath that success story, another reality slowly emerged. Kerala has become one of India's fastest-ageing societies, and the social consequences of that transformation are now impossible to ignore.

Responding to this demographic shift, the newly elected United Democratic Front government in Kerala has announced India's first exclusive Department for Senior Citizens along with a quasi-judicial Senior Citizens Commission meant to protect the rights and welfare of elderly people.

The initiative, inspired partly by Japan's ageing-care systems, is being projected as a long-term social intervention rather than another welfare scheme.

Chief Minister V D Satheshan said the state can no longer treat ageing as merely a private family concern.

"Protection of senior citizens is essential for a civilised society. Kerala is entering a phase where ageing has become a major governance issue involving dignity, healthcare, mobility, safety and social justice," Satheshan said.

A silent crisis

Kerala already has the highest proportion of elderly citizens among major Indian states. People above the age of 60 constitute nearly one-fifth of the population, and the number is expected to rise sharply over the next two decades. By 2030, elderly citizens are projected to account for nearly one-fourth of the state's population. Unlike many Indian states that still have younger demographic profiles, Kerala is ageing rapidly because of lower birth rates, longer life expectancy, improved healthcare and large-scale migration of younger generations.

The effects are visible across the state.

In districts like Pathanamthitta, Kottayam and Alappuzha, elderly couples increasingly live alone in homes once occupied by large joint families. Many widowed women survive with little financial independence. Bedridden seniors often depend entirely on local volunteers or informal caregiving systems. Emotional isolation, depression and age-related illnesses are rising steadily.

Much of the policy thinking behind Kerala's new initiative emerged from years of research conducted by migration scholar S Irudaya Rajan at the Centre for Development Studies in Thiruvananthapuram. His studies in migration-heavy regions documented how elderly parents were being left behind as younger generations moved away for employment.

The studies revealed a silent social crisis unfolding in Kerala's countryside. Even when children continued to send money home, many elderly parents were experiencing loneliness, neglect and emotional abandonment.

Senior Indian Administrative Service officer Adeela Abdulla, who has

been associated with social justice policy planning, said Kerala had reached a point where ageing itself must become central to governance discussions.

"The issues are not limited to healthcare. Loneliness, mobility, emotional insecurity and the weakening of traditional caregiving structures are becoming major concerns," she said. Kerala already runs several welfare programmes for elderly citizens, including home-care schemes, palliative initiatives and community-based support projects. However, officials admit these interventions remain fragmented and inadequate for the scale of the challenge confronting the state.

State steps in

The proposed Senior Citizens Commission is expected to integrate welfare support, legal protection and policy intervention within a single institutional framework.

Transport Minister C P John, who is expected to hold additional charge of the new department, said the traditional social systems that once protected elderly people were weakening rapidly.

"The joint family structure has changed. Migration has altered relationships within families. Increasingly, elderly parents are living alone. Many face emotional abandonment even when financial support is available," John said.

According to him, elderly welfare can no longer remain confined to pensions and charity-driven schemes. "Senior citizens deserve dignity, legal protection and meaningful participation in society. Many people between 60 and 70 are active, skilled and capable of contributing enormously to public life," he said.

The proposed commission will have quasi-judicial powers to intervene in cases involving neglect, abuse and denial of rights. It will also monitor the implementation of the Maintenance and Welfare of Parents and Senior Citizens Act, 2007, which legally obligates children to support ageing parents but remains weakly implemented in many parts of the country.

Apart from grievance redressal, the commission is expected to advise the government on age-friendly policies and public infrastructure.

Kerala's interest in Japanese ageing-care systems comes from the similarities both societies increasingly face. Japan, one of the world's oldest societies, has moved towards community-based elderly care, assisted living systems and home-based support rather than relying entirely on institutional care facilities.

Kerala now hopes to adapt some of those principles to local realities. Instead of isolating elderly citizens in old-age homes, the state plans to strengthen domiciliary care systems that allow senior citizens to continue living within familiar neighbourhoods and social environments.

The government also plans to ensure trained caregivers for bedridden senior citizens through coordination between the Health Department, Social Justice Department and local

self-government institutions.

Another major concern shaping the policy is what experts describe as the "feminisation of ageing".

Women in Kerala generally outlive men by several years. As a result, a large section of elderly women live alone as widows, often with limited income, weak social protection and high emotional vulnerability.

In many villages, elderly women spend years in isolation because children live abroad or in distant cities. Social workers say they are among the most vulnerable sections within Kerala's ageing population.

The state's proposed intervention also seeks to address the everyday struggles elderly people face in public spaces.

Senior citizens frequently complain about inaccessible hospitals, lack of seating in public institutions, unsafe roads, confusing banking procedures and public transport systems that are unfriendly to ageing bodies.

The government is considering several age-sensitive reforms including low-floor buses, safer pedestrian crossings, wheelchair access in public buildings, priority facilities in hospitals and improved accessibility in banking and government offices.

Policy planners are also discussing the creation of a "skill bank" involving retired professionals, teachers, engineers and administrators who can continue contributing to society through local governance initiatives, mentoring programmes and digital literacy campaigns.

The initiative additionally aims to strengthen intergenerational relationships at a time when migration and urbanisation are reshaping family life in Kerala. Awareness campaigns in schools and colleges are expected to become part of the state's larger strategy to rebuild social sensitivity towards elderly people.

However, social activists and healthcare experts caution that institutional announcements alone cannot resolve Kerala's ageing crisis.

The state already faces shortages of trained geriatric caregivers, mental health professionals and long-term care infrastructure. Chronic illnesses associated with ageing, including dementia, Alzheimer's disease, diabetes and stroke-related disabilities, are placing increasing pressure on Kerala's healthcare system.

Questions also remain regarding implementation, funding and coordination between multiple departments and welfare agencies.

Yet supporters of the initiative believe Kerala may once again be anticipating a future that the rest of India has not fully recognised.

India's elderly population is expected to increase sharply in the coming decades, but ageing still remains largely absent from mainstream policy discussions in most states.

Kerala's new department and commission therefore represents something larger than administrative restructuring. They acknowledge that ageing, loneliness and dignity are becoming defining social questions in modern India. (Courtesy: Down To Earth)

Qdenga in India: Promise, Precedent, and the Long Road to Dengue Control

By: Lakshmy Ramakrishnan

Dengue is a mosquito-borne viral infection prevalent in tropical and subtropical areas. The World Health Organization (WHO) places half the world's population at risk of infection, with escalating global tolls. The number of dengue cases has risen from just over half a million in 2000 to 14.6 million reported cases in 2024, with India reporting 0.12 million cases in 2025. Rapid urbanisation and poor urban planning, along with rising temperatures, have significantly contributed to the spread of dengue, which is now endemic in over 100 countries. With no specific treatment available, prevention has been critical. The development of a safe and efficacious vaccine has been challenging, owing to the complexities of immune responses to dengue infection. In March this year, a Subject Expert Committee of the Central Drugs Standard Control Organisation (CDSCO) approved the introduction of a dengue vaccine — Qdenga — marking a significant turn in the battle against dengue. An integrated strategy nonetheless remains essential for meaningful dengue control.

This is the fundamental challenge in developing a dengue vaccine — a safe and efficacious vaccine must provide protective immunity against all four serotypes; otherwise, partial immunity (through a vaccine, for instance) could lead to severe outcomes if the person is subsequently exposed to dengue naturally.

Dengue (DENV) infection can be caused by any of four genetically similar but distinct types, or serotypes — DENV-1, DENV-2, DENV-3, and DENV-4. Infection can be asymptomatic, result in dengue fever that resolves on its own, or lead to more severe outcomes such as dengue haemorrhagic fever (DHF) or dengue shock syndrome (DSS), which require hospitalisation and can sometimes be fatal. A secondary dengue infection with a different serotype carries considerable risk: pre-existing antibodies (from a previous infection, for example) facilitate viral entry and increase disease severity instead of providing protection against the subsequent infection. This is the fundamental challenge in developing a dengue vaccine — a safe and efficacious vaccine must provide protective immunity against all four serotypes; otherwise, partial immunity (through a vaccine, for instance) could lead to severe outcomes if the person is subsequently exposed to dengue naturally.

Qdenga's Promise

Japan's Takeda has developed a tetravalent vaccine — Qdenga (TAK-003) — that has now received approval from India's CDSCO Subject Expert Committee. This approval is subject to a post-marketing safety and effectiveness study within six months of its introduction in India, reflecting a cautious regulatory approach. Qdenga comprises a two-dose regimen given three months apart and does not require prior exposure to the dengue virus. It has been approved in 41 countries and almost 25 million doses have been distributed. It is the WHO-recommended dengue vaccine, with the organisation recommending its administration for children aged 6 to 16 in high-burden regions. The European Medicines Agency (EMA) and the United Kingdom (UK) extend this recommendation to people aged 4 to 60. Indone-

sia was the first country to approve Qdenga in 2022, while Brazil has since incorporated it into its national immunisation programme. In India, Hyderabad-based Biological E has entered into a partnership with Takeda for local manufacturing of the vaccine.

For individuals under the age of 6 who have never been exposed to dengue, some evidence indicates a potential enhancement of disease following DENV-3 and DENV-4 infection. This is particularly concerning as DENV-3 has begun to re-emerge in several Asian and South American countries.

Detailed studies examining Qdenga's efficacy reveal that it is promising yet nuanced. Mathematical modelling studies demonstrate that under moderate-to-high transmission settings, vaccination of individuals over the age of 6 could diminish dengue-related hospitalisations by 10 to 22 percent over a 10-year period. The vaccine is highly protective against DENV-2 irrespective of prior exposure to dengue, as its backbone is based on a live-attenuated (weakened) DENV-2 strain. It offers moderate protective immunity against the other serotypes in individuals who have previously been exposed to dengue. However, for individuals under the age of 6 who have never been exposed to dengue, some evidence indicates a potential enhancement of disease following DENV-3 and DENV-4 infection. This is particularly concerning as DENV-3 has begun to re-emerge in several Asian and South American countries. Further, vaccine efficacy was found to decline over time — from approximately 80 percent against symptomatic

presents. Dengvaxia is currently offered only to individuals who have previously been exposed to dengue, but Sanofi will likely cease manufacturing owing to low vaccine uptake.

India's Panacea Biotech has developed the country's first indigenous dengue vaccine candidate — DengiAll — and, in partnership with the Indian Council of Medical Research (ICMR), has launched Phase III clinical trials.

Brazil, which carries one of the largest dengue burdens globally, recently approved another dengue vaccine in November 2025: Butantan-DV, developed by the Butantan Institute, a Brazilian biologics research centre. It is approved for individuals aged 12 to 59 and is the world's first single-dose dengue vaccine. Compared to Qdenga, Butantan-DV's single-dose regimen offers a practical advantage, as adherence to a second dose remains a challenge. Additionally, India's Panacea Biotech has developed the country's first indigenous dengue vaccine candidate — DengiAll — and, in partnership with the Indian Council of Medical Research (ICMR), has launched Phase III clinical trials.

Integrated Strategies
While the SEC approval of Qdenga in India is a significant milestone in the CDSCO's approval process, addressing the global dengue burden requires an integrated strategy. For instance, biological vector control methods such as the introduction of Wolbachia-infected mosquitoes, which suppress dengue transmission, have been found to be effective. Wolbachia-infected mosquitoes pose little risk to humans or the environment

and have been observed to reduce the dengue burden in Singapore. In addition, collaborative partnerships between India and the European Union (EU) under the COMBAT initiative will employ tools such as artificial intelligence (AI) and advanced modelling for outbreak prediction, identification of biomarkers for determining clinical outcomes, and strengthening the understanding of dengue infection. Finally, the Serum Institute of India (SII) is conducting Phase III clinical trials involving a monoclonal antibody treatment and will partner with the Drugs for Neglected Diseases Initiative (DNDi) to extend trials to dengue-endemic countries. Meanwhile, the antiviral drug monodenvir — despite showing promise in a Phase 2a trial — was discontinued by Johnson & Johnson as part of the company's reprioritisation of its communicable disease portfolio. Negotiations to identify an alternative developer to continue these efforts are underway.

The approval of Qdenga represents a significant milestone in the battle against dengue, but the disease's complexity remains. India will need to ensure that its rollout is carried out in a phased, evidence-based manner — one that emphasises pharmacovigilance, supports investment in domestic manufacturing (including the development of indigenous vaccine candidates), and promotes other dengue control measures. The Dengvaxia episode serves as a stark reminder of dengue's complexities and what can occur when a vaccine is deployed faster than comprehensive pharmacovigilance studies allow. A cautious rollout of Qdenga can ensure that it translates into an effective public health tool. (Courtesy: ORF)

dengue one year after the second dose to about 45 percent by year three — underscoring that vaccination alone is not a long-lasting solution. These findings reinforce the notion that an ideal dengue vaccine offering long-lasting protection against all four serotypes, regardless of prior exposure, may be difficult to achieve.

The Dengvaxia Episode

Scrutiny over dengue vaccines was highlighted by the experience with Dengvaxia — the world's first licensed dengue vaccine — developed by Sanofi Pasteur. Post-market surveillance of Dengvaxia revealed enhancement of disease in individuals who had never been exposed to dengue, increasing their likelihood of hospitalisation upon subsequent natural exposure. This finding emerged after Dengvaxia had been licensed and approved by several governments, including the Philippines, where a large-scale immunisation campaign — which included children — was followed by reports of hospitalisations. This underscores that post-market surveillance is crucial, given the immunological complexity that dengue

Pro-Trump candidate takes lead in Colombia's presidential race with promise of crime crackdown

BOGOTA, June 1: Bombastic pro-Trump lawyer Aberaldo de la Esperiella pulled ahead as a leader in Colombia's race for the presidency in the first round of elections over the weekend, capitalising on a growing appetite for heavy-handed crackdowns on criminal groups across Latin America.

But the second-place finisher, progressive senator Ivan Cepeda, and his ally President Gustavo Petro questioned the results of the election Sunday night without providing evidence.

De la Esperiella rapidly gained traction in the lead up to Sunday's election, winning nearly 44 per cent of the vote, and surpassing progressive senator Ivan Cepeda, who had consistently led polling throughout the campaign and won less than 41 per cent of the vote.

The two are slated to continue on to a runoff election on June 21, where de la Esperiella is expected to scoop up additional votes from Colombians who supported other conservative candidates in the first round.

Cepeda will face an uphill battle in the runoff, said Sergio Guzman, a Colombian political analyst. "Aberaldo de la Esperiella won the first round. In other words, that's a shift in public opinion that is very difficult to overcome. So now Aberaldo is emerging as the likely favourite to win."

Joining a political shift in the Americas

De la Esperiella, known as "El Tigre" or "The Tiger," has never held office in Colombia and prided himself on living a luxurious life in Italy before becoming deciding to run for president.

He pitched himself as an outsider who

would cozy up to President Donald Trump and follow El Salvador President Nayib Bukele's war on gangs, which has driven down homicide rates but fuelled accusations of human rights abuses.

"I will wipe out narco-terrorism and those who I've declared a military target like cockroaches, like rats. I will unleash upon them the wrath of God never seen before," De la Esperiella said in an interview with The Associated Press in the final stretch of the campaign, where he promised to open 10 mega-prisons to fight crime.

He joins a growing number of leaders across Latin America — from Chile to Honduras — seeking to latch onto the "Bukele model" as voters across Latin America are increasingly ditching leaders that pitched progressive policies aimed at addressing the root issues of conflict, such as lack of opportunities for young people and corruption.

De la Esperiella's supporters come from a

wide range of backgrounds. Yolanda Perez, a 64-year-old woman serving coffee in the downtown of Colombia's capital of Bogotá who smoked a cigarette and said with a wink the day before the election: "I'm thinking of voting for El Tigre."

Miguel Maheca, a 20-year-old first time voter flashed a paper showing that he voted to his mom while he strolled out of the voting station on Sunday, saying with a grin, "Love isn't what's going to make us safe in Colombia."

But experts say El Salvador's security successes will be nearly impossible to replicate in a place like Colombia, which is more than 50 times larger than the Central American nation and has many more armed groups warring for territory.

The polarised vote comes as the Trump administration is playing a more aggressive role in Latin America than any US government in decades, placing mounting pressure on countries like Colombia, Mexico, and Ecuador to crack down on crime.

De la Esperiella, 47, made a name for himself as a lawyer defending high-profile clients such as former President Alvaro Uribe (2002-2010), as well as controversial figures like Alex Saab, a close ally of Venezuela's ousted president Nicolas Maduro who faces legal issues in the US and whom he stopped representing about seven years ago.

A blow to Cepeda

De la Esperiella's rise as a presidential candidate spells trouble for progressive Cepeda, who consistently led polls in the lead up to Sunday's election, though his competitor

quickly gained speed in the weeks ahead of the vote.

Cepeda is a progressive senator who has promised to carry on his ally Petro's fraught plan to achieve "total peace" by negotiating peace pacts with guerrillas and criminal gangs.

Their political movement was born from a fierce rejection by many Colombians of a militarised offensive by Uribe in decades past used to beat back the guerrillas of the Revolutionary Armed Forces of Colombia, or FARC, which ended in thousands of civilians being killed by Colombian forces in a scandal known as "false positives."

Mr. De la Esperiella "represents a return to the paramilitary politics and drug-trafficking, — a mafia-run, plutocratic, and corrupt past that the country experienced during Alvaro Uribe's two administrations," Cepeda said on Sunday.

Petro, a former rebel, won Colombia's presidency in 2022 in a historic election that ended decades of right-wing domination by leaders from Uribe's political movement. He gained massive support from rural-dwelling, indigenous and poorer Colombians who felt they had never been directly spoken to by Colombian leaders.

Now, that movement is backed into a corner.

"This is De la Esperiella's election to lose," wrote Renata Segura, director of International Crisis Group's Latin America and the Caribbean Program. "Cepeda thought he could win appealing squarely to the left, and that proved to be a massive mistake. How he pivots in the next month will determine if he has any chance to win." (AP)

Rescuers dig for bodies after massive mining explosives blast in Myanmar kills at least 38

BANGKOK, June 1: More than a dozen rescue and charity groups used excavation machinery on Monday to recover bodies following a massive blast from stored mining explosives in northeastern Myanmar.

The explosion occurred Sunday at noon in Kaungput village, Namhkam township in Shan State near the Chinese border.

Initial reports had suggested there were at least 45 deaths, but local rescue volunteers now put the number of dead at 38-40. Determining the exact death toll has been complicated because several bodies were blown apart by the force of the explosion.

Many of Myanmar's resource-rich areas, where most mining operations have been largely unregulated, are controlled by different armed militias engaged in sporadic fighting against the central government to seek greater autonomy. Accidents, such as deadly landslides, are fairly common.

The Ta'ang National Liberation Army, or TNLA, an ethnic armed group that controls the Namhkam area, said Sunday's blast involved gelignite used in local mining and stone quarrying. Although gelignite is commonly used, it becomes highly unstable over time if stored poorly.

Residents of the 200-household village reported that they were never told explosives were being kept there. An investigation into the specific cause of the explosion is underway, the TNLA said.

The incident has cast a spotlight on Myanmar's lucrative but largely unregulated mineral industry and Chinese investment in the country's extractive industries.

Two local residents told The Associated Press on Monday that mines producing raw materials for silicon metal — a key industrial substance used in semiconductors, solar panels, and aluminum alloys — are located in mountainous areas about 15 kilometres southwest of Namhkam town.

The residents, who spoke on condition of anonymity to protect their safety, said the mines are operated jointly by the TNLA and Chinese businessmen and are inaccessible to most residents. The claim couldn't be independently verified by the AP.

Myanmar's mining industry is a major global provider of rare earth elements, copper, tin, and precious gems, especially jade and rubies, and is the main supplier to China, where the extracted materials are processed and refined.

China maintains a complex role as a top ally to Myanmar's military-backed government while also fostering relations with the ethnic minority groups.

Chinese Foreign Ministry spokesperson Lin Jian in Beijing expressed deep condolences and confirmed that a Chinese national injured in the blast is receiving medical treatment. Beijing has pledged assistance in handling the aftermath.

The TNLA, part of the Three Brotherhood Alliance, seized control of the Namhkam area in late 2023 during a major offensive against the military government.

This conflict is part of the broader turmoil following the February 2021 military coup, which ousted the elected government of Aung San Suu Kyi and triggered widespread armed resistance. (AP)

Bad news keeps coming for Keir Starmer

LONDON, June 1: His poll ratings are dismal and rivals are eyeing his job. Now British Prime Minister Keir Starmer faces more embarrassment on Monday with the publication of hundreds of pages of files about former UK ambassador to Washington Peter Mandelson, a friend of convicted sex offender Jeffrey Epstein.

The government is expected to comply with a demand by lawmakers to release documents related to Mandelson's appointment to, and conduct in, the UK's most important diplomatic post.

Mandelson was fired after nine months, and fallout from the misjudged appointment has left Starmer fighting for his job.

A first trove of files published in March revealed ministers had been warned that Mandelson's friendship with Epstein exposed the government to "reputational risk."

It later was disclosed that Mandelson had been approved for the ambassador's job despite failing security checks, a revelation that sparked bitter blame-trading between Starmer and senior civil servants who oversaw the security vetting.

The files being released Monday could run to more than 1,000 pages and are expected to include emails and text messages between Mandelson and government ministers and advisers.

Police have asked for some documents to be withheld because they form part of a criminal investigation into Mandelson for alleged misconduct in public office.

Mandelson, 72, was briefly arrested in February by detectives investigating allegations he passed sensitive government information to Epstein when he was a minister in the British government a decade and a half ago. He has been released without bail conditions as the police investigation continues.

Health Secretary James Murray said Monday that the release marked an "unprecedented" level of transparency from the government.

"It's right we do that. We have been very clear that the appointment of Mandelson was wrong," he told Sky News. Conservative lawmaker Alex Burghart said any attempt to withhold or redact more documents than those requested by police "will be viewed by the House as a contempt of Parliament, and as a cover-up by the British public." French Navy, backed by UK, intercepted sanctioned tanker from Russia: Macron

PARIS, June 1: The French Navy, with support from the United Kingdom, has intercepted an oil tanker under international sanctions that was travelling from Russia, the most recent effort by nations that support Ukraine to target Russian oil exports helping to finance President Vladimir Putin's war.

French President Emmanuel Macron announced the interception in a post Monday on X, saying the Tagor was boarded on Sunday in the Atlantic.

The post included a video showing a person rappelling from a helicopter onto a ship. It is the latest in a series of French naval interceptions of tankers suspected of links to Russia.

"It is unacceptable that boats skirt international sanctions, violate the law of the sea and finance the war that Russia has been waging for more than 4 years against Ukraine," Macron wrote.

"These ships, that don't respect the most elementary rules of maritime navigation, are also a threat to the environment and everyone's security."

Oil revenue is a key part of Russia's economy, allowing Putin to pour money into the war

effort against Ukraine without worsening inflation for everyday people and avoiding a currency collapse.

Russia is believed to be using a fleet of hundreds of ships to evade international sanctions

imposed over the war. France and other countries have vowed to crack down on the sanction-busting so-called "shadow fleet."

Responding to the latest French interception, Kremlin spokesman Dmitry Peskov said Monday that Russia "considers such actions illegal."

"They border on piracy," he said Monday. "We absolutely disagree that they are being carried out in full compliance with international law."

French maritime authorities said the tanker was intercepted more than 400 nautical miles west of France, in international waters in the Atlantic. It was travelling from the northwestern Russian port of Murmansk, according to the authorities' statement.

It said the tanker is suspected of operating under a false flag and that the French navy is now escorting it to an anchorage for more checks.

Tankers previously intercepted by France include the Deyna, boarded in the Mediterranean Sea in March. Another tanker, the Grinch, intercepted in the Mediterranean in January, was released in February after paying a multimillion-euro penalty. (AP)

US bombs Iranian military sites, Kuwait hit by drone, missile fire

DUBAI, June 1: The United States said Monday that it bombed radar and drone sites in Iran after Tehran shot down an American drone over the weekend. Iran then said it launched a strike of its own, and Kuwait reported incoming fire.

The nominal ceasefire between Iran and the US has been repeatedly tested with such back-and-forth attacks, even as officials from both countries try to negotiate an end to the war.

It's not clear how close they are to a deal — and there is always the risk that an attack could derail those talks.

In the meantime, Iran has maintained its chokehold on the Strait of Hormuz, disrupting global energy supplies and driving up the price of fuel around the world, with far-reaching consequences.

Fighting has also escalated between Israel and the Lebanese militant group Hezbollah, despite their nominal ceasefire. Israel has extended its occupation deep into Lebanon, and Hezbollah — which joined the war in support of its main backer, Iran — continues to launch drones into Israel. The US military's Central Command said it carried out the strikes in Iran on Saturday and Sunday around the city of Geruk and on Qeshm Island.

"The measured and deliberate strikes occurred... in response to aggressive Iranian actions that included the shootdown of a US MQ-1 drone that was operating over international waters," Central Command said.

"US fighter aircraft swiftly responded by eliminating Iranian air defences, a ground control station, and two one-way attack drones that posed clear threats to ships transiting regional waters."

Kuwait said its air defences opened fire early Monday morning to intercept incoming drone and missile fire.

Around the same time, Iran's paramilitary Revolutionary Guard said it responded to an American attack without saying where, likely referring to the attack on Kuwait. In a statement carried by the state-run IRNA news agency, the Guard said that US forces had targeted a telecommunications tower. (AP)

Confirmed Ebola cases in Congo reach 282 as survivors describe their recoveries

BUNIA (CONGO), June 1: At least 282 confirmed cases of Ebola have now been reported in Congo's ongoing outbreak, the central African nation said late Sunday, as patients who recovered from the disease spoke of their indescribable joy in interviews with The Associated Press. The outbreak remains focused in Congo's eastern Ituri province, where 264 of the cases have been recorded, Congo's Ministry of Health said. Congo has reported over 1,000 suspected cases with the Bundibugyo virus, the current species of Ebola, which has no approved treatment or vaccine.

According to the health ministry, the main challenges in containing the outbreak include early detection and rapid isolation of cases, rigorous contact tracing, safe and dignified burials and strengthening infection prevention and control in health facilities.

The contact tracing coverage rate so far is 45% with 220 suspected cases under investigation, the ministry said.

Meanwhile, some of the five people who have so far recovered from the disease spoke of their relief in interviews with The Associated Press.

Baraka Bulumbu, a nurse, said he was overjoyed after the last two Ebola tests on him returned negative.

Bulumbu was among those presented certificates of recovery by the World Health Organisation Director-General Tedros Adhanom Ghebreyesus as he opened a new Ebola treatment centre in Bunia, the capital of Ituri province, on Sunday.

"The first one came back positive, but the second and third were negative for me," Bulumbu said with a wide grin. "Coming out of this illness alive is an indescribable joy."

Ezo Etienne, another nurse who recovered from the disease, said he first started feeling dizzy during ward rounds at the hospital as he checked on patients.

"That was how it started," he recalled. "I called the team and told them, 'Something's wrong here.' I checked my blood pressure and saw that I was immediately experiencing hypotension (low blood pressure). I decided to rest for a bit, and a few minutes later I started vomiting." The WHO has said all five survivors are health workers — four nurses and a laboratory worker — a group most affected in the outbreak.

Treatments so far have mostly targeted patients' symptoms, the organisation has said. "Your courage gives hope and your living story, that this outbreak can be stopped," Tedros told the health workers on Sunday.

Neighbouring Uganda has also reported nine cases of Ebola and closed its border with Congo seeking to limit its spread.

Although more than 20 Ebola outbreaks have taken place in Congo and Uganda, the Bundibugyo virus has been rare. The lack of approved vaccines and treatments, as well as the remote locations and armed violence in hot spots, have made the current response challenging.

Despite the challenges, the recoveries are "a victory worth celebrating," said Dr Dieudonne Mwamba Kazadi, the director-general of Congo's National Institute of Public Health. (AP)

Bangladesh, Cyprus in fray for President of 81st UNGA session

UNITED NATIONS, June 1: Bangladesh and Cyprus will face off this week in a closely-watched election for the President of the 81st session of the UN General Assembly.

Bangladesh Foreign Minister Khalilur Rahman and Cyprus' Special Envoy for Multilateralism Ambassador Andreas Kakouris are vying to lead the 193-member General Assembly during its 81st session, which begins in September.

The General Assembly, the chief deliberative, policy-making and representative organ of the United Nations, will vote on June 2 to elect its next president for a one-year term.

In line with the established regional rotation, the President of the 81st session will be elected from the Asia-Pacific Group.

The election will be held a day before the 193-member Assembly elects five new non-permanent members to the 15-nation UN Security Council for the 2027-28 term.

The successful candidate will succeed current General Assembly President and

former German foreign minister Annalena Baerbock, who is only the fifth woman to hold the post in the UN's 80-year history.

Rahman was sworn in as Bangladesh's Foreign Minister in February this year. Earlier, he served as National Security Adviser and High Representative for the Rohingya issue in Bangladesh's interim government led by Muhammad Yunus.

Kakouris brings more than four decades of diplomatic and administrative experience in multilateral and bilateral diplomacy. He has served as Cyprus' Ambassador and High Commissioner to the United States, among other senior diplomatic assignments.

He is currently Special Envoy for Multilateralism in the Ministry of Foreign Affairs and most recently served as Permanent Secretary/State Secretary of the ministry.

The election comes amid raging global conflicts, a deeply polarised UN Security Council failing to fulfil its mandate of maintaining international peace and security, and heightened scrutiny of the ef-

fectiveness of the United Nations amid mounting financial constraints.

The world body has also begun the process of selecting its next Secretary-General as the tenure of incumbent UN chief Antonio Guterres is due to conclude at the end of next year.

In his vision statement, Rahman out-

lined six priority areas for his presidency: "Silence the Guns, Amplify the Voices", "No One Left Behind, No Country Left Out", "Our Planet, Our Pact", "Rights and Protection -- Freedom from Fear and Want", "Innovation with Inclusion", and "We the Peoples -- Reimagined".

"As a candidate from the Global

South, I carry the aspirations of developing countries, but as president, I will be everyone's president -- acting without fear or favour and serving the interests of the entire membership," he said.

Rahman said the 81st session would feature several "milestone events that will test our collective resolve", from addressing the existential threats of sea-level rise, pandemic preparedness, to the right to development and nuclear disarmament.

"If elected President of the General Assembly, I will dedicate myself to rebuilding trust, nurturing consensus, and opening space for good faith negotiations that will lead to outcomes for all that are owned by all," he said.

If elected, Rahman would be the second person from Bangladesh, after Humayun Rasheed Choudhury, to head the UN General Assembly. Bangladeshi diplomat and former Parliament speaker Choudhury had served as President of the 41st session of the UN General Assembly in 1986.

Kakouris, in his vision statement, iden-

tified five priority areas: "Strengthening the Assembly's Capacity to Deliver: From Commitment to Implementation", "Peace and Security: Protecting People, Preventing Crises", "Development and Resilience: Climate, Oceans and Disaster Preparedness", "Enablers for the Future: Finance, Technology and Cooperation", and "Governance, Inclusion and Accountability".

"As President of the 81st Session of the General Assembly, I will work to strengthen the Assembly's capacity to deliver through dialogue, inclusion and practical cooperation, so that our common home remains credible, effective and responsive to the needs of our peoples," he said.

Kakouris said he would focus on agendas with measurable outcomes and credible implementation plans, particularly at a time when the UN system is preparing for a transition to a new Secretary-General.

If elected, Kakouris would become the first Cypriot to head the UN General Assembly. (PTI)

EC reviews progress of SIR in Sikkim, asks BLOs to assist voters in filling up forms

GANGTOK, June 1: The Election Commission on Monday reviewed the progress of the Special Intensive Revision (SIR) of electoral rolls in Sikkim, a statement said.

EC Director Shubhra Saxena assessed the status of Enumeration Form distribution, elector verification and other activities during a meeting held at the Office of the Chief Electoral Officer in Gangtok.

Emphasising the importance of maintaining accurate and inclusive electoral rolls, she directed officials to ensure that all eligible voters are covered during the revision exercise.

Saxena, who is on a visit to the

state till June 4, stressed that Booth Level Officers (BLOs) must actively assist electors in filling up Enumeration Forms and uploading the required information through the ECINET portal.

The review meeting also discussed the verification and mapping of electors whose records may not be readily traceable in ear-

lier electoral rolls.

Officials were advised to adopt appropriate verification procedures and make effective use of available records to ensure accurate identification and enrolment of eligible electors, the statement said.

Saxena underscored the need for meticulous field-level verification and strict adherence to timelines prescribed by the EC for the successful completion of the SIR.

The meeting was attended by CEO Raj Kumar Yadav, District Election Officers and Booth Level Officers. The enumeration phase of the exercise commenced on Saturday and will continue till June 28. (PTI)

Mizoram eligible to receive ₹ 650 crore incentive under SASCI: CM Lalduhoma

AIZAWL, June 1: Mizoram Chief Minister Lalduhoma on Monday said the state government is eligible to receive Rs 650 crore under the Special Assistance to States for Capital Investment programme for the current financial year.

Addressing a meeting-cum-workshop on SASCI and Real-time System of Integrated Quick Transfers (SNA SPARSH) in Aizawl, Lalduhoma, who also holds the finance portfolio, said technological advancements have transformed the way central funds are received and managed, making financial administration more efficient and transparent.

He said since SNA SPARSH has become the principal platform through which the state receives and manages a significant portion of its funds, it is essential that all departments have a clear understanding of its operation to ensure smoother implementation of schemes.

During the event, Lalduhoma said the state had received an incentive of Rs 350 crore under SASCI Part 9 for efficiency in financial management due to its strong performance and coordinated efforts during the previous year.

He said the state government is determined to secure all reform-linked incentives available under various SASCI components during the current financial year as well.

To facilitate this objective, the government has delegated financial powers to all administrative heads under the Charter of Financial Advisers to streamline and expedite the issuance of administrative approvals and expenditure sanctions, he said.

The CM emphasised the importance of timely fund utilisation, stating that departments must promptly utilise funds once sanctions are received and ensure SNA SPARSH accounts are closed without delay. (PTI)

Mukesh Singh assumes charge as Manipur DGP

IMPHAL, June 1: IPS officer Mukesh Singh on Monday assumed charge of the Manipur director general of police, an official statement said.

Singh was accorded a guard of honour by Manipur Police at its headquarters at Mantripukhri in Imphal East district. He replaced Rajiv Singh, a 1993-batch Tripura-cadre IPS officer, who took charge of the Manipur Police chief at the height of ethnic conflict in June 2023.

Following his completion of tenure in the state, Rajiv Singh was transferred as the secretary (security) in the cabinet secretariat in New Delhi.

"Following the ceremonial reception, the new DGP held a brief introductory meeting with senior police officers and discussed key policing priorities. He emphasised the importance of professionalism, upholding the Constitution of India and the Rule of Law, coordination with sister agencies, and impartiality and neutrality in the discharge of duties to the public," the statement said.

Mukesh Singh, a 1996-batch IPS officer, had previously served as the police chief in Ladakh. He arrived in Imphal on Saturday. The Centre had recently cleared the appointment of Singh on inter-cadre deputation from the AGMUT (Arunachal Pradesh-Goa-Mizoram-Union Territories) to the Manipur cadre for a tenure of three years.

The order was issued by the Department of Personnel and Training (DoPT) under the Ministry of Personnel, Public Grievances and Pensions. (PTI)

Over 6K govt officials to conduct Census 2027 in Nagaland

HT Correspondent

DIMAPUR, June 1: More than 6,000 government officials will be engaged in the conduct of Census 2027 in Nagaland.

The census will be carried out in two phases. The first phase of house-listing operations will provide citizens an opportunity to enumerate their households through online self-enumeration facility from June 16 to June 30.

This will be followed by verification of the self-enumerated data and enumeration of households. The second phase, scheduled for February 2027, will involve the population enumeration, during which population data will be collected across the state. The directorate of census operations, Nagaland, has appealed to all citizens to actively participate and extend their full cooperation in ensuring the successful conduct of Census 2027. Nagaland has completed the training of field trainers for all 17 districts as part of the preparations for the Census of India 2027. A total of 130 field trainers from across the state underwent a three-day residential training programme, conducted in four batches.

The trained field trainers will subsequently impart training to census supervisors and enumerators during June 2026 across Nagaland, covering 157 sub-districts, municipalities, and towns.

The training programmes, held between May 20 and May 29, witnessed 100% participation and were successfully organised under the DCs of Dimapur, Mokochung, Kohima, and Phok.

Arunachal govt launches 5th edition of entrepreneurship development programme

ITANAGAR, June 1: Arunachal Pradesh Chief Minister Pema Khandu on Monday announced the launch of the fifth edition of the entrepreneurship development programme for 2026-27, aimed at strengthening the state's startup ecosystem by providing seed funding support and nurturing promising ideas.

Khandu said the Arunachal Pradesh Entrepreneurship Development Programme (APEDP) 5.0 seeks to create employment opportunities and boost the local economy through innovation and enterprise development.

"The Arunachal Pradesh Entrepreneurship Development Programme (APEDP) 5.0 (2026-27) has been launched to support and nurture the startup ecosystem of our state.

"With seed funding support for 100 innovative startups, including substantial assistance for the top-performing ventures, this initiative aims to transform ideas into successful enterprises, generate employment, and strengthen our local economy," the CM said

in a post on X. Khandu urged the youth, entrepreneurs, self-help groups, professionals and innovators "to seize this opportunity and submit their applications before July 20".

The chief minister asserted that the initiative reflects the government's commitment to fostering innovation, encouraging self-employment and building a vibrant startup ecosystem capable of generating jobs and contributing to Arunachal Pradesh's long-term economic development.

Officials said the top 20 startups will receive financial assistance of Rs 10 lakh each, while the remaining 80 will be provided Rs 8 lakh each to help scale their ventures and accelerate business growth.

The programme will focus on key areas, including entrepreneurship development, pre-incubation and incubation support, livelihood acceleration and seed funding assistance, creating a "comprehensive support system" for startups at different stages of development, they said. (PTI)

Fighting for rights of unemployed youth, urge them to join our movement: TYCC

AGARTALA, June 1: The Tripura Youth Congress Committee (TYCC) on Monday said it has been fighting for the rights of the unemployed youth to push the state government to fill vacant posts in different departments.

Addressing a press conference here, TYCC president Neel Kamal Saha claimed that the issue of unemployment and job crisis has reached a critical stage in the state, "where TET (teacher eligibility test) qualified candidates are not sure about getting government jobs".

"The TYCC has been fighting for the rights of the unemployed and the Gen Z to compel the government to fill vacant posts in various departments. We urge the unemployed youth and the Gen Z to join our movement to get their problems addressed," he said.

"Among government departments, the education department offers the largest number of employment opportunities in the state. However, although nearly 15,000 teachers have retired over the past seven-eight years, those vacancies have not been filled and many posts are being abolished," Saha claimed.

Saha said according to a NITI Aayog report, the northeastern state currently has "340 single-teacher schools" with an enrolment of 6,492 students.

"The NITI Aayog document warns that multi-grade classrooms without adequate instructional support adversely affect learning outcomes and place excessive pressure on teachers," he said.

"We want jobs for the youth and the Gen Z instead of drugs, which have already destroyed at least two generations of the state," the TYCC chief asserted. (PTI)

Meghalaya records progress in child nutrition

SHILLONG, June 1: Meghalaya has reported encouraging progress in child nutrition, with the National Family Health Survey-6 recording a decline in stunting among children under five from 46.5 per cent in NFHS-5 to 36.8 per cent in NFHS-6. The improvement reflects sustained efforts by the government, frontline workers and communities to strengthen maternal and child health and nutrition across the state.

NFHS-6 also pointed to strong breastfeeding indicators. "The survey also highlights encouraging breastfeeding practices, with 76.4 per cent of children breastfed within one hour of birth and 97.1 per cent of infants under six months currently breastfeeding," an official statement said. Officials attributed the

gains to "a coordinated effort involving government departments, frontline workers, local institutions and communities working together to address malnutrition and improve health outcomes for mothers and children."

"Despite persistent challenges such as geographic isolation, difficult terrain and limited access to health services in remote areas, Meghalaya has steadily strengthened its nutrition ecosystem through integrated multi-sectoral programmes and community-based interventions," the statement said.

Frontline workers have been key to the shift. "Accredited Social Health Activists (ASHAs), Anganwadi Workers and Auxiliary Nurse Midwives (ANMs), have played a pivotal role in this effort,

serving as the vital link between government services and communities," it noted. The state has focused on early detection of malnutrition through "regular Village Health and Nutrition Days (VHNDs)" for growth monitoring. "Children identified with Severe Acute Malnutrition (SAM) and Moderate Acute Malnutrition (MAM) are referred to Nutrition Rehabilitation Centres for appropriate care and support."

Home-based interventions are also in place. "Additional support is provided through Home-Based Newborn Care (HBNC) and Home-Based Young Child Care (HBYC), enabling vulnerable children and their families to receive continued counselling and monitoring directly at home." (NNN)

GOVERNMENT OF ASSAM

OFFICE OF THE DISTRICT COMMISSIONER:: WEST KARBI ANGLONG:: HAMREN

(Email: wkaddma@gmail.com)

No.DDMA.1/Pt/2025/160

Dated-30-05-2026.

Re-Tender Notice

Notice for quotation is sealed cover affixing court fee stamp Rs. 8.25 (Rupees Eight & Twenty Five Paise) only is hereby invited from registered Govt. Manufactures/Distributors/Suppliers / reputed firms / individuals etc. of Assam for the supply of items in connection with relief and rehabilitation operation during any kind of disaster. The rate should be quoted for each items separately inclusive of GST & others taxes and supply order shall only be given as and when situation demands. The intending quotationer must submit sample along with rate quoted during office hours before 3:00 PM on 9/06/2026 addressing to the District Commissioner cum Chairperson, DDMA, West Karbi Anglong, Hamren.

Revised Security deposit amount is Rs. 5000.00 (Rupees five thousand only).

For details, intending quotationer may visit o/o the District Commissioner, West Karbi Anglong, Hamren during office hours.

Memo No.ACEH/E(G)/10/2025-26/31 -A,

Dated Diphu, the 01st June '2026.

'BJP not seeking revenge against TMC' CID notice to Abhishek over 2 MLAs' complaint: Suvendu

KOLKATA, June 1: Asserting that the BJP government was not seeking revenge against the TMC, West Bengal Chief Minister Suvendu Adhikari on Monday said the CID sent a notice to MP Abhishek Banerjee following a complaint by two of his own party's MLAs.

He said two TMC MLAs -- Ritabrata Bandyopadhyay and Sandipan Saha -- complained to the Assembly Secretariat that their signatures in the party's resolution for appointing Sobhandeb Chattopadhyay as the leader of opposition were forged. Immediately after the CM's press conference, the Trinamool Congress expelled the two legislators from the party for "anti-party activities". "It may seem like vengeance to some, but we do not want to do any such thing since the party (TMC) is already defunct," the CM said.

Abhishek Banerjee and some other TMC leaders have alleged a political vendetta by the BJP government in the state over its actions. Adhikari maintained that neither the BJP nor the government has any role in the Criminal Investigation Department (CID) sending a notice to Banerjee to appear before it on Monday in connection with its probe into the alleged forgery of signatures.

Mocking the TMC over its Falta candidate Jahangir Khan withdrawing from the contest two days before the poll on May 21, he

said, "This shows that the party is effectively defunct."

Maintaining that the signatures were forged, Adhikari said, "I have asked the CID to take action under the Bharatiya Nyaya Sanhita (BNS) provisions for forgery."

Adhikari said the CID gave a notice to Banerjee, the TMC national general secretary, to appear before it on Monday with the resolution book. The chief minister said the state's DGP told him that Banerjee has sought more time to appear before the CID.

Adhikari said it is up to the CID to decide whether to grant anyone an extension due to illness or other issues, maintaining that he will not interfere. Banerjee has, through his lawyers, sought an extension of time to appear before the CID, cit-

ing health-related issues. Adhikari said that on May 9, in a letter to the Assembly Speaker, "the all India general secretary of regional party Trinamool Congress" wrote that veteran party leader Sobhandeb Chattopadhyay be appointed as the Leader of Opposition.

Enumerating the sequence of events leading to the CID investigation, Adhikari said that on May 18, on the order of the Speaker, the principal secretary of the Assembly, had written to Abhishek Banerjee to submit the minutes of the resolution for appointing Chattopadhyay. On May 20, the TMC national general secretary sent a copy of the resolution with the signatures of 70 party MLAs, of which more than 10 names are in block letters, Adhikari said, hold-

ing that signatures "cannot be in block letters". The chief minister said that two TMC MLAs -- Ritabrata Bandyopadhyay and Sandipan Saha -- complained to the Speaker, alleging "no resolution was adopted regarding the selection of the Leader of Opposition on May 6".

Adhikari said the complaints alleged that the resolution dated May 6, 2026, was manufactured and fabricated, stating that as many as 14 signatures were in block letters.

"On the direction of the Speaker, the principal secretary filed an FIR at Hare Street police station, and on the direction of the Home secretary, with my approval as the state home minister, the investigation was handed over to the CID," the chief minister said.

He said the CID questioned 13 TMC MLAs with video photography, accompanied by handwriting experts for signature verification, in connection with the probe.

Adhikari said TMC MLAs Baharul Islam of Canning Paschim, Chandranath Sinha of Bolpur, Arup Roy of Howrah Madhya, Tapas Maity of Domjur, Nayana Banerjee of Chowranghee, Tapas Mondal of Raidighi, Subhasish Das of Mahestala, Toraf Hossain Mondal of Kumarganj, Dinen Roy of Kharagpur, Kunal Ghosh of Belehata, Abdul Aziz Doctor of Lalgola, Abdul Matin of Haroa and Tauseffur Rahman of Basirhat Uttar were questioned. (PTI)

BJP attacks Kapil Sibal over 'ashamed to live in India' remark

NEW DELHI, June 1: The BJP on Monday hit out at Rajya Sabha MP and senior advocate Kapil Sibal over his remarks criticising the ruling party, accusing him of "hating India" and alleging that he remained silent on incidents of post-poll violence in West Bengal in 2021.

The attack came in response to Sibal's remarks on Sunday that he was ashamed that he was living in a country where the party in power would use any means to destroy the foundations of democracy, while referring to the attack on TMC MP Abhishek Banerjee.

In a video statement, BJP national spokesperson Shehzad Poonawalla said the senior advocate earned "crores of rupees" by practising in the country's Supreme Court and yet claimed to be ashamed of living in India.

"Kapil Sibal says that he is ashamed to live in India. The question is, when post-poll violence happened in 2021 and more than 300 BJP workers and Congress workers were allegedly killed, Kapil Sibal never opened his mouth. The same Kapil Sibal kept quiet even during cases such as RG Kar and Sandeshkhali," he said.

Poonawalla said political differences with the government are acceptable but questioned a "tendency" among some opposition leaders to attack the country because of their opposition to the BJP. "Opposing the BJP is one thing, but why oppose India? You can have political differences, but why hate India?" Poonawalla said.

He also referred to Congress leader Rahul Gandhi's past remarks and alleged that some opposition leaders routinely questioned India's democratic institutions, judiciary and security forces.

"Today, just because you have a problem with the BJP, you end up hating India. Rahul Gandhi says that he will fight the Indian state. He says democracy is over and that the US and the UK need to intervene. Kapil Sibal says he is ashamed to live in India. Somebody else questions the valour of our forces during Operation Sindoor. Somebody questions the democratic institutions of this country. Somebody challenges the judiciary," he said.

Commenting on the attack on Banerjee, Poonawalla said nobody justified the heckling faced by him and claimed that some of those arrested in connection with the incident were linked to the Trinamool

Congress. "Whatever it may be, nobody has justified it," he said, while alleging that several opposition leaders are treating the episode as an internal feud rather than condemning the incident. "In fact, some of the people arrested appear to be linked to the TMC. A majority of them have not condemned the attack. Perhaps, it is an internal fight and feud. Whatever it may be, nobody has justified it," he said.

Poonawalla alleged that a section of the opposition was portraying India negatively before the world because of its political opposition to the BJP. "This shows how, in opposing the BJP, they end up opposing the nation, and that is troubling," he said.

Another BJP spokesperson Pradeep Bhandari also slammed Sibal, saying that his remarks were "an insult of crores of Indian voters; voters of Bengal and Indian democracy". (PTI)

AAP protests outside south Delhi DC office

NEW DELHI, June 1: The Aam Aadmi Party workers on Monday staged a protest outside the South Delhi deputy commissioner's office in Green Park demanding the resignation of senior officers over the Saket building collapse, which claimed six lives.

Scores of party workers carrying placards and raising slogans, gathered outside the office of South Zone Deputy Commissioner Rakesh Kumar demanding his resignation.

"We are here to raise the concerns of people. Illegal construction going on across the city under the BJP government. Whose responsibility was it to stop the illegal construction ongoing at the building that collapsed?," asked Ashu Thakur, AAP's MCD councillor from Chittaranjan Park area in south Delhi.

Thakur alleged that despite complaints regarding the building's purported unauthorised construction, no action was taken by the authorities.

Delhi AAP President Saurabh Bharadwaj said councillors from MCD's South Zone had surrounded the deputy commissioner's office to demand accountability.

"All AAP councilors from MCD South Zone surrounded the DC office, demanding action against IAS Rakesh Kumar. Repeated complaints about the illegal building were sent to the DC, but no action was taken," Bharadwaj said in a post on X.

Six people were killed and eight others injured after a multi-storey commercial building housing a coaching centre, cafes and offices collapsed near Saket Metro Station in south Delhi on Saturday evening. (PTI)

TN CM Vijay holds roadshow in Tiruchirappalli

TIRUCHIRAPPALLI, June 1: Tamil Nadu Chief Minister C Joseph Vijay held a roadshow here on Monday and was accorded a rousing reception by the people and TVK workers on his arrival from the state capital.

As soon as Vijay arrived, he was accorded a ceremonial police salute, and Ministers Aadhav Arjuna and S Ramesh, senior officials, Lok Sabha MP Durai Vaiko welcomed him.

Later, he travelled in a van from the airport to the venue of the public meeting, St Joseph College, a distance of roughly 10 km.

Seated in the front, he waved to the people who were waiting on both sides of the road. Party workers and locals showered flowers on his vehicle at several places and they enthusiastically shouted 'Vijay'.

Police had made tight security arrangements in view of the visit of the chief minister. (PTI)

35 MLAs take oath as ministers West Bengal cabinet undergoes expansion

KOLKATA, June 1: BJP MLAs Swapna Dasgupta, Tapas Roy and Shankar Ghosh were among the 35 legislators who took oath as ministers on Monday as West Bengal CM Suvendu Adhikari expanded his cabinet, taking the total strength of the council of ministers to 41.

A carefully-crafted balance, based on geographical, ethnic and gender considerations, characterised the expanded council of ministers of the first BJP-helmed government in the state.

Governor RN Ravi administered the oath of office to the legislators at a programme held at Lok Bhavan here in the presence of Adhikari, the existing ministers of his cabinet and senior bureaucrats of the state administration.

While 13 BJP MLAs were sworn in as cabinet ministers, three took oath as ministers of state (Independent Charge) and 19 others were inducted in the council as ministers of state.

"The distribution of portfolios for the ministers will take place on Wednesday during a meeting which will be chaired by the CM at the secretariat," cabinet minister Tapas Roy said.

With five cabinet ministers, besides Adhikari, having already taken oath on May 9, the total strength of the state's council of ministers stood at three short of the Constitution-mandated optimal count of 44 in the 294-member state assembly.

The inductees also represented the cross-section of Bengal's society -- with doctors, academics, journalists, and even those who worked in blue-collar jobs, such as house helps, before getting into politics, being offered berths in Adhikari's council.

The BJP inducted Sharadwat Mukherjee, an oncologist who won the Bidhannagar seat, and Kalyan Chakraborty, a professor from Khardaha, as cabinet ministers.

Another oncologist from Behala Paschim, Indranil Khan, was sworn in as minister of state (Independent Charge), while Kalita Majhi, who worked as a house help before foraying into politics, was awarded the position of minister of state.

Journalists-turned-politicians Swapna Dasgupta, who won the prestigious Rashbehari seat in south Kolkata, and Jagannath Chattopadhyay from Suri in Birbhum were also awarded cabinet berths.

Newly elected BJP MLAs Dudh Kumar Mondal, Deepak Burman, Manoj Oraon, Gouri Shankar Ghosh and Arjun Singh were

among those who took oath as cabinet ministers. BJP legislators Rajesh Mahata and Malati Rava Roy were sworn in as ministers of state (Independent Charge) in the government.

Among the ministers of state who were administered the oath were Joyel Murmu, Ashok Dinda, Anandamoyi Burman, Koushik Chowdhury, Gargi Das Ghosh, Bhaskar Bhattacharya, Dibakar Gharami and Sumana Sarkar.

BJP MLAs Santanu Pramanik, Purnima Chakraborty and Umesh Rai were also sworn in as ministers of state.

Considering the presence of minister Nisith Pramanik, a Rajbanshi leader from the SC-reserved Mathabhanga seat in Cooch Behar, already in the cabinet, three new ministers -- Deepak Burman from Falakata, Shankar Ghosh from Siliguri and Manoj Kumar Oraon from Kumargram in Alipurdur -- took oath in the government's expanded cabinet from north Bengal.

With Malati Rava Roy given a MoS berth (Independent Charge) and four others -- Anandamoyi Burman from the Matigara-Naxalbari seat in Darjeeling district, Bishal Lama from Kanchin in Alipurdur, Koushik Chowdhury from Raiganj, and Biraj Biswas from Karandighi in Uttar Dinajpur -- awarded MoS positions, the total count of ministers from north Bengal stood at nine.

North Bengal is a region where the BJP gained a decisive electoral edge over the Trinamool Congress, and from where sustained complaints of administrative neglect were made during the erstwhile Mamata Banerjee rule. Compared to the erstwhile TMC ministry during its third term in power, where eight of the 43 ministers were from north Bengal, the overall picture of the Adhikari council looked like a minor improvement in terms of representation from the region.

Agnimitra Paul, MLA from Asansol Dakshin, who was earlier sworn in as a cabinet minister and entrusted with the Women and

Child Welfare portfolio, would remain the lone woman representative in Adhikari's cabinet.

Following Monday's expansion, she would now have for colleagues Rava Roy as MoS with independent charge and four other women MLAs -- Moumita Biswas Mishra from Bardhaman Dakshin, Purnima Chakraborty from Shyampur, Gargi Das Ghosh from Kandi and Sumana Sarkar from Balagarh -- as junior ministers.

The total count of women ministers in the Bengal BJP dispensation is six, lower than the nine women in Mamata Banerjee's 2021 cabinet.

The expanded council currently comprises 14 ministers representing various ethnic groups of the state, 11 of whom were sworn in on Monday from the SC and ST categories.

The BJP inducted Deepak Burman, a SC MLA from Falakata, and Manoj Kumar Oraon, a tribal leader from Kumargram, both hailing from the Alipurdur district in north Bengal, in the state cabinet.

With Pramanik, a Rajbanshi leader and his cabinet colleagues, Matua leader Ashok Kirtania and tribal community representative Kshudiram Tudu, already sworn in as cabinet ministers, the total count of SC/ST leaders in the cabinet stood at five.

That apart, Rajesh Mahata, a leader of the SC Kudmi community from Gopiballavpur in Jhargram in the western part of Bengal, was inducted as a minister of state (Independent Charge).

Three BJP MLAs, representing the ST community, and six others from the SC group, were additionally awarded space as ministers of state, taking the total count of ministers representing backward castes to 15, nearly 37 per cent of the state's ministers.

The oath-taking ceremony was held three weeks after Adhikari was sworn in as the CM on May 9 in the presence of PM Narendra Modi, Union Home Minister Amit Shah, the BJP's central leadership and CMs of NDA-ruled states.

The cabinet expansion was expected this week as Adhikari and state BJP chief Samik Bhattacharya held meetings in New Delhi with the party's central leadership last week about the induction of members in the council. The May 9 swearing-in ceremony was held at the Brigade Parade Grounds after the BJP got 208 seats in the recently concluded polls, ending the TMC's 15-year rule. (PTI)

'Beware of pickpockets': Rahul slams govt over CBSE re-evaluation cost

NEW DELHI, June 1: Congress leader Rahul Gandhi on Monday attacked the Modi government over the CBSE's re-evaluation process and cost, saying that when education is treated not as a service but as a business, errors are not corrected but multiplied.

Gandhi shared a video snippet from his conversation with CBSE students facing problems due to the On-Screen Marking (OSM) system of the Board.

"Beware of pickpockets - today, they are sitting right inside the CBSE. If your marks are incorrect due to a CBSE error, what do you get? A bill: Digital scanned copy: Rs. 100 per subject. Retotalling: Rs. 100 per paper. Re-evaluation: Rs. 25 per question," Gandhi said in a post in Hindi on X, accompanying the video clip.

A student may have to pay up to Rs 2,000 just to ensure the accurate evaluation of their own answer sheet, the Leader of Opposition in the Lok Sabha said.

Just imagine the revenue CBSE is generating when 400,000 students have submitted such applications, he said.

When scanning is done using mobile phones, incorrect marking is inevitable, Gandhi said, adding the cost of rectifying those errors is being borne by the student.

"The mistake belongs to the CBSE. The punishment falls on the student. The profit goes to the government," the former Congress chief said.

"When education is treated not as a service, but as a business, errors are not corrected - they are multiplied. And the heaviest price for this is being paid by our children - with their time, their self-confidence, and their future," Gandhi said. Vedant, a Class 12 student, had recently alleged in a post on X that the Physics answer sheet uploaded by the CBSE under the re-evaluation process was not his. It went viral, after which several other students took to social media with similar claims.

In the video, Gandhi is seen having an informal chat with Vedant, his brother and other students about their ordeal.

In the video clip, Gandhi is seen asking the students about the cost of re-evaluation and the modalities of the process.

"This is what we are seeing, not just

in NEET, in CBSE, everywhere, that you have financialised the education system. The second is over-centralisation. So you have taken the whole system and you have centralised the whole system. So if there is a problem, it is a critical failure of the system.

"Whereas if you have a decentralised system, then one node fails, another node fails, you can still manage it. So there is a structural problem now in the Indian education system," says Gandhi in the video, interacting with the students.

This is the second clip he has shared from the interaction.

Gandhi on Sunday had targeted the Centre over the CBSE OSM row, sharing the first video clip of his interaction with the group of students and describing them as brave young Indians who asked the Modi government simple questions but received "insults instead of answers".

Asserting that the students deserved a bright future, Gandhi had said, "We will make sure they get it".

Posting the clip on his social media accounts, Gandhi had described it as a "revealing chat with my fellow 'anti-national Soros agents'".

"Vedant and his friends are brilliant, brave young Indians who asked CBSE and the Modi government simple questions -- but got insults instead of answers," Gandhi had said in his post on X, accompanying the video.

"They deserve a bright and secure future. We will make sure they get it," he added.

Several CBSE Class 12 students had flagged mix-up cases after accessing scanned copies uploaded on the portal and finding that the answer sheets did not belong to them.

The CBSE later reached out to them and shared their correct answer sheets. The Board said that it had taken up on "top priority" the cases related to alleged mismatched answer sheets and other concerns faced by students in the re-evaluation process.

Experts from IIT-Madras and IIT-Kanpur, along with Digital Infrastructure Corporation of India (DICI), are examining the system and strengthening the portal and payment gateway integration, according to government sources. (PTI)

Haldwani forest division starts AI-based wildlife acoustic monitoring for birds

HALDWANI, June 1: In a first-of-its-kind initiative, Haldwani forest division has launched an innovative bird monitoring initiative using advanced wildlife acoustic recorders and AI-based analysis for scientific assessment of avian biodiversity, a senior official said on Monday.

Under this initiative, automated wildlife acoustic recorders are being deployed in forest areas to continuously capture natural sounds and bird calls from the environment, Haldwani Divisional Forest Officer (DFO) Kundan Kumar said. These devices are capable of recording sounds round-the-clock with minimal human disturbance, he said.

"Since every bird species has unique vocal signatures and call patterns, the recorded audio data can be analysed using AI-based

software to identify species and assess their occurrence and activity. The collected audio recordings will be processed using machine learning and deep learning algorithms capable of analysing thousands of hours of acoustic data in a short time," Kumar said.

The system can help identify bird species, estimate their presence and relative abundance, understand activity patterns and generate valuable scientific insights regarding habitat use and biodiversity status.

"Haldwani forest division considers this initiative an important step towards integrating modern technology with wildlife conservation in Uttarakhand. Use of wildlife acoustic recorder and artificial intelligence (AI)/machine learning-based technology for bird monitoring is being done for the

first time in Uttarakhand," he said.

A significant advantage of this technology is its ability to effectively monitor nocturnal bird species such as owls and nightjars, Kumar explained.

Traditional bird surveys often face challenges in detecting

assessment of their presence and distribution," Kumar, a 2017-batch Indian Forest Service (IFoS) officer, said. In addition to bird monitoring, the acoustic data generated through this initiative can contribute to broader ecological assessments by providing insights into ecosystem health, habitat quality, seasonal changes in biodiversity and responses of wildlife communities to environmental pressures, he said.

Haldwani forest division is recognised as one of the most important bird habitats in Uttarakhand, owing to its unique location at the interface of the Himalayan foothills and the Terai ecosystem.

The division harbours a rich diversity of resident and migratory bird species, including several rare and conservation-significant birds. Notably, the Red-Headed Trogan,

one of India's most charismatic forest birds, has so far been recorded only from Haldwani forest division within Uttarakhand, Kumar said.

Furthermore, during the bird census conducted by the division in December 2025, the Black Baza was recorded for the first time in Uttarakhand, highlighting the importance of systematic bird monitoring and the potential for new avian discoveries, he said.

"The new initiative will help create long-term biodiversity datasets useful for monitoring population trends, migration patterns, breeding behaviour and habitat changes. The technology can improve detection of rare, cryptic and conservation-priority species, enhancing understanding of their distribution and habitat requirements," the DFO added. (PTI)

GOVERNMENT OF ASSAM
OFFICE OF THE DISTRICT COMMISSIONER :: WEST KARBI ANGLONG :: HAMREN,
(Email: wkaddma@gmail.com)

No. DDMA.1/Pt/2025/158

Date: 30th May, 2026

RE-TENDER NOTICE FOR FINALIZATION OF RATES & EMPANELMENT OF VENDORS
IN CONNECTION WITH PROVIDING RELIEF MATERIALS TO CALAMITY AFFECTED
FAMILIES.

In cancellation of earlier tender notice vide no. DDMA.1/Pt/2025/156, dated 11/05/2026, Sealed tenders are invited affixing fee stamps worth Rs.8.25 (Rupees eight and paise twenty-five) only from interested Wholesalers/Suppliers/Firms/Traders from open market for supplying the following items as Gratuitous Relief (G.R) attached herewith as Annexure-I & Annexure-II for providing to the calamity affected families, victims of flood/natural calamities/other emergencies for the year 2026-27.

The detailed terms and conditions of this Tender may be downloaded from the website <https://westkarbianglong.assam.gov.in>.

1. Description of Items:**Annexure-I**

Sl. No.	Items of Name of item	Quantity/Brand	Rate	
1	2	3	4	
1	Rice	(Best Quality) Grade-A (Common) Grade-B	Per KG	Per Qtl.
2	Chira (Flattened Rice)	Best Quality	Do	Do
3	Muri (Puffed Rice)	Best Quality	Do	Do

2. Date of issue of Notice Inviting Tender 30-05-2026

3. Schedule for issue and submission of tender:-

- a) Period of issue and receipt: 30/05/2026 to 09/06/2026 up-to 2:00 PM.
b) Opening of Tender: 09/06/2026.

4. Quotation received after closing date will not be entertained.

5. Quotation should be submitted in duplicate on printed pad with Sales Tax/GST Number of the firm enclosing DD/Bank Draft for Rs. 5,000/-(Rupees Five Thousand) only as bid security/earnest money in favour of District Commissioner cum Chairperson DDMA, West Karbi Anglong.

6. The following terms and condition should be strictly observed for submitting the quotations failing which the quotations shall be liable to be rejected.

- A) The Wholesaler/Supplier/Firm/Trader should Wholesaler/Supplier/Firm/Trader. be registered
B) The Quotations should be submitted in duplicate and on printed pad preferably with GST/Sales Tax Number for the firm. The duplicate copy of the quotations must bear original signature.
C) The Wholesaler/Supplier/Firm/Trader should be financially sound so that GR items can be supplied immediately within 12 hours.
D) The Wholesaler/Supplier/Firm/Trader will submit the statement of Income Tax assessment for the last 3 financial years 2024-25, 2025-26, and 2026-27.
E) Wholesaler/Supplier/Firm/Trader should have a valid Tax Registration Certificate (GST) and TIN/PAN Number.
F) Weightage will be given during evaluation to Wholesaler/Supplier/Firm/Trader having prior experience in supply of items during flood/natural calamities/other disturbances.
G) The whole supply as per order shall have to be completed in short notice within 24 hours failing which the District Commissioner shall have the right to accept or reject any quantity of goods ordered. The Wholesaler/Supplier/Firm/Trader should sign an agreement to this effect.
H) Preference will be given during evaluation to the Wholesaler/Supplier/Firm/trader of West Karbi Anglong district for supply of GR materials in respective district areas and for those outside the district should have local representative(s) in this district with the necessary authority to liaise with the District Administration, West Karbi Anglong and supply the GR items in short notice if selected.
I) The rate must be quoted both in figures and words and over writing should be avoided; however, all overwriting/corrections must be duly authenticated.
J) The firm shall give declaration in writing stating it has not been blacklisted by Govt. of India/Assam//any other state Got. And does not have any criminal case against it.
K) The Wholesaler/Supplier/Firm/Trader can quote for one and more or all GR items. However, during evaluation the bids, the preferred bidder will be selected separately.
L) Payment will be made after receipt of materials in full and in good condition and on availability of fund.
M) The undersigned does not bind him to accept the lowest quotation and shall have the right to reject one or more or all quotations without assigning any reason thereof.
N) The undersigned reserves the right to cancel/reject quotation/bid for quoting the rate of item(s) far below the prevailing market rate.
O) Due to exigency of public services, the undersigned reserves the right to give supply order to any supplier/vendor who has not participated in this tender process for prompt supply of GR materials during emergency situation.
P) The rate should be including of the cost of packing & transportation cost and inclusive of cost of delivery to District/Co-District Head Quarters.
Q) Rates should be including all taxes.
R) If there is any doubt regarding the quality of materials supplied, the payment authority should have the right to test the materials and the defective materials shall have to be replaced by the firm/supplier at his own risk & cost.
S) Material as per specifications & samples will be accepted.
7. Authorized bidders or their representatives are to attend at the time of opening of the bids at the scheduled date and time along with sample of the item bided for.
8. Bidders are requested to submit particulars for Technical and Financial parts as per the Annexure-1 and Annexure-11 respectively. The bidders are also advised to go through the General terms and conditions and satisfy themselves before submitting the quotation.
9. The undersigned reserves the right to accept or reject any offer or empanel more than one bidder without assigning any reason and also deserves the right to extend validity period of accepted tender for certain period in emergency situation.
10. The nature/quantum of GR Materials for Supply will be at the discretion of District Commissioner and Chairperson, DDMA, West Karbi Anglong. Further issuance of supply order for aforesaid relief items will be only in event of occurrence of flood/natural calamities other emergencies and based on essentiality as decided by the District Administration and mere selection of the Item/Tender through this Tender Notice shall not entitled any right whatsoever for replacement of supply order.
- Further the replacement of work order (supply order) for the Gratuitous Relief (GR) material(s) shall take place only in the event of the District Administration represented by the District Commissioner, West Karbi Anglong deciding (in this sole judgment) to provide relief to Victims of the flood or natural calamities or other disturbance also will not entitle the selected bidders any right of claim of replacement of work order for supply of Gratuitous Relief (GR) items from other sources.
11. The undersign reserves the right in all circumstances to accept or reject any Tender without assigning any reason thereof, besides the right of accepting the Tender of more than one supplier (provided the rates are found justifiable) in the event of any emergency also based on the demand of the situation or any other eventuality the District Commissioner, West Karbi Anglong reserves the right to procure Gratuitous relief (GR) items from other sources.
12. Rates of the items should not be more than the printed MRP.
13. The supplier should mention the brand against all quoted items compulsory.
14. Sample of materials must be supplied with the bid documents.
15. The undersigned reserves the right to accept or reject the tender process without assigning any reason.
16. Bidders should maintain sufficient stock to ensure immediate supply during emergencies.
17. Bidders must be capable of supplying items within 2 (two) hours after receipt of supply order.
18. Quality must be ensured, substandard or expired materials will lead to legal actions and forfeiture of security money.
19. Payment is subject to availability of funds and Govt. approval, made through Bank A/C only.
20. Suppliers with prior complaints in Govt. requirements may not be considered.

Before submitting their bids, the interested bidders are advised to contact with the office of the District Commissioner, West Karbi Anglong for any clarifications on the nature and scope of the work mentioned in the Tender document up to 09/06/2026 during working hours.

District Commissioner-cum-Chairperson,
DDMA, West Karbi Anglong
Dated: 30th May, 2026.

Memo No. DDMA.1/Pt/2025/-A,

SUMAN KALYANPUR: LAST OF THE GOLDEN ERA VOICES GIVEN FINAL SENDOFF WITH STATE HONOURS

“Rahen Na Rahen Hum”... the strains of that elegiac song played in the backdrop as the last rites of Suman Kalyanpur, who should have been part of a Lata-Asha-Suman playback powerhouse but may not have got her full due, were held here on Monday with state honours.

The singer of melodies, ranging from the soulful “Na Tum Hamen Jano” to the rocking “Aaj Kal Tere Mere”, died on Sunday night following age related ailments at her home. She was 89.

Her body was draped in the tricolour and Mumbai Police personnel offered a ceremonial salute at the Santacruz auditorium where daughter Charu performed the last rites.

As the pyre was lit, many friends and family

enriched our cultural world. Through her songs, she created a special place among music lovers and admirers of Indian cinema. Condolences to her family and admirers. Om Shanti,” Modi wrote on X.

The singer, also known for memorable numbers such as “Behna Ne Bhai Ki Kalai Mein” and “Na Na Karke Pyaar”, was perhaps the only female singer of her era to make a space for herself in the Hindi music scene dominated by Lata Mangeshkar and Asha Bhosle.

Her melodious voice was often compared to Mangeshkar, something which became both a blessing and a curse. Those who could not afford Mangeshkar would sign up Kalyanpur. Her breakout moment came when Mangeshkar and

Anand Virji Shah, of the legendary Kalyanji-Anandji composer duo, described Kalyanpur as very talented.

They collaborated on songs such as “Na Na Karte Pyar”, “Tumhi Mere Meet Ho Tumhi Mere Preet Ho”, “Aap Se Humko Bichhade Huye”.

“We worked with her on quite a few songs. She was very easygoing; she would do rehearsals, and she would pick up the song quickly. We shared a great professional relationship,” Anandji told PTI.

Mangala Khadilkar, who wrote Kalyanpur’s biography, said Kalyanpur sang more than 3,500 songs in 13 Indian languages, most prominently in Hindi, Marathi and Bengali.

“Her personality was reflected in her singing. The softness, sweetness, and gentleness of her nature found expression in her songs. Her voice was often compared to Lata ji’s voice but while there were similarities, they were distinctly different.

“I would describe ‘bhavgeet’ music as an equilateral triangle: Lata Ji with her divine voice, Asha Ji with her colorful and versatile voice, and Suman Kalyanpur Ji with her honey-sweet voice, marked by humility, composure and grace,” Khadilkar told PTI.

Born in January 1937 in Dhaka, Kalyanpur initially pursued art and studied at the JJ School of Art but music was her true calling and she later trained under Pandit Keshav Rao Bhole, Abdul Rehman Khan and Guruji Master Navrang.

She made her playback debut in Hindi cinema with “Mangu” and sang three songs, but when composer Mohammed Shafi was replaced by O P Nayyar, only one of her tracks were included in the final movie. The song was “Koi Pukare Dheere Se Tujhe”.

Her most popular song “Na Tum Hamen Jano” was from Dev Anand-Waheeda Rehman hit “Baat Ek Raat Ki” with music by S D Burman. She also sang the title track for “Dil Ek Mandir Hai”. “Yun Hi Dil Ne Chaha” and “Chura Le Na Tumko Yeh Mausam Suhana” were hits from “Dil Hi To Hai”. The movie also had Mangeshkar and Bhosle as singers alongside Mukesh.

In many albums from the era, Kalyanpur got the duet but Mangeshkar the solos.

In “Jahan Ara”, she sang the duet “Baad Mudat Ke Yeh Ghadi Aayi” with Rafi. Mangeshkar was credited for the other four songs in the movie. Similarly, in “Sanjh Aur Saveri”, “Ajhuni Na Aye Balamwa” was sung by Kalyanpur and Rafi while Mangeshkar was credited for solo numbers. Bhosle also sang a duet in the film with Rafi.

In 2023, Kalyanpur was awarded with the Padma Bhushan. (PTI)

sang the evocative duet “Rahen Na Rahen Hum, Meheka Karengi” from the 1966 film “Mamta” to bid a final farewell to the singer who made her presence felt -- and became the legend she was -- despite the domination of the Mangeshkar sisters.

“The passing of Suman Kalyanpur, who enriched Indian music, is an irreparable loss to the world of Indian art. She enchanted people with her melodious singing in Hindi and Marathi, as well as in numerous other Indian languages,” President Droupadi Murmu said in a post on X in Hindi.

From classical melodies to popular songs, the scope of her contributions is immensely vast and influential, the president said.

Prime Minister Narendra Modi said he was anguished by her passing.

“Her melodious voice and soulful renditions

Mohammed Rafi had differences over the issues of royalties. Because of this, Kalyanpur sang over 100 duets with Rafi.

“Suman ji had a great bond with abba and they both sang some really beautiful songs. She was a down-to-earth and humble person. Suman ji was with my father when he had an issue with Lata ji... during this time, his duets were mostly with Suman ji and Asha ji,” Mohammed Rafi’s son Shahid Rafi told PTI.

Kalyanpur’s songs would often get wrongly attributed to Mangeshkar. In 2022, Kalyanpur told PTI that Mangeshkar was a close friend.

“Everyone loved her (Lata’s) songs, and she will be immortal. We recorded a duet together for the film ‘Chand’. Everytime I met her, it felt like I met a close friend. I believe she felt the same,” she said after Mangeshkar’s death.

YOU CANNOT REDUCE HER TO A NUMBER ON A SCALE: MADHURI DEFENDS AISHWARYA AGAINST TROLLS

Aishwarya Rai Bachchan is a global star who has made her country proud with her achievements, says Madhuri Dixit, coming out in support of her “Devdas” co-star who faced trolling over her appearance on the red carpet of the Cannes Film Festival.

Aishwarya, a Cannes regular for more than two decades, became the target of online trolling and body-shaming after images and videos from the 2026 red carpet circulated on social media.

Madhuri said Aishwarya has built a legacy by representing India on the global stage and trolling her over her appearance sends the wrong message to youngsters.

“She has been going there for 20 years. She has done the whole country proud. She is a global star. As a Miss World, she has done so much for the country.

“You cannot reduce her to a number on a scale or a number on the dress or the size or a number on the calendar years. You cannot reduce her to that. She is beautiful. She looks beautiful but she is beautiful inside,” Madhuri told PTI.

The actor and Aishwarya worked together in Sanjay Leela Bhansali’s period romance drama “Devdas” with Shah Rukh Khan.

In fact, Aishwarya first attended Cannes in 2002 for the premiere of the film alongside Shah Rukh. Her appearance on the red carpet in a traditional yellow saree drew widespread attention back then and she is often seen as India’s representation at the festival. Madhuri

criticised the negative social media discourse around Aishwarya’s appearance.

“I think people have to realise that when you do these kinds of comments, what kind of message are you sending to the youngsters today? That your worth is on how you look, not on your achievements. I think this is a completely wrong message being sent,” Madhuri said.

Not just Aishwarya, recently actor Ananya Panday found herself at the receiving end of a social media storm following the release of her romantic drama “Chand Mera Dil”.

A scene in which her character Chandni performs a fusion of Bharatanatyam and hip-hop went viral, triggering a wave of criticism. Many called her out for “butchering” the dance form, with some describing it as an act of cultural disrespect. According to Madhuri, social media has become a tool for anyone to comment on anything.

“Even earlier, there were people like that. Those who comment, they didn’t have a means to comment. But today, they have the means,” said the actor.

Triptii Dimri, who stars alongside Madhuri in the upcoming Netflix movie “Maa Behen”, echoed the actor.

“It’s very easy to sit at home in your comfortable pyjamas and comment on people. But being in their shoes, those who have worked hard to achieve something, whether it’s Ananya or Aishwarya ma’am, they both worked hard in their lives. They are achievers,” she said. (PTI)

From single screen to city icon: Jaipur’s Rajmandir cinema celebrates 50 years

Jaipur’s iconic Rajmandir Cinema will celebrate its golden jubilee on June 1 with free screenings of five popular films, marking 50 years of its journey as one of India’s most celebrated single-screen theatres, officials said.

“Rajmandir has witnessed every phase of the entertainment industry and continues to remain a key attraction of the city,” finance manager Kishore Kala said, adding that the theatre has retained its charm despite the rise of OTT platforms and multiplexes.

The films selected for the occasion are ‘Hum Aapke Hain Koun..!’, ‘Dilwale Dulhania Le Jayenge’, ‘Ram Teri Ganga Maili’, ‘Zindagi Na Milegi Dobara’ and ‘Chupke Chupke’, which will be screened throughout the day.

Kala said some of these films enjoyed record runs at the theatre, ‘Hum Aapke Hain Koun..!’ running for more than 500 days.

Office in-charge Ankur Khandelwal said the cinema had never been viewed merely as a business venture.

“This cinema has never been seen merely as a business. It is an emotional landmark for Jaipur and we are committed to preserving it as a tourist attraction.”

Known for its palace-like architecture, grand interiors and distinctive lighting, Rajmandir continues to draw numbers of domestic and foreign tourists.

Film distributor Raj Bansal described it as “the top single-screen theatre in the country and a matter of pride for Rajasthan”.

Another distributor, Sanjay Chettar, said, “every distributor wants their film to be screened at Rajmandir because of its legacy and grandeur.”

Tourists also expressed admiration, with one visitor saying they came “not just to watch a film, but to experience the cinema itself.”

Opened in 1976, on Jaipur’s busy MI Road, Rajmandir remains one of city’s most prominent landmarks, blending cinematic history with tourism appeal. (PTI)

He-Man’s global fandom surprised ‘Masters of the Universe’ stars Nicholas Galitzine & Camila Mendes

Actors Nicholas Galitzine and Camila Mendes, who star in “He-Man and The Masters of the Universe”, could fully grasp the massive global popularity surrounding the iconic superhero character He-Man only after they were cast in the movie adaptation.

The new film is based on Mattel’s famous toy line, which inspired a successful animated TV series in 1983 and a 1987 film starring Dolph Lundgren as He-Man, the most powerful man in the universe.

Galitzine, known for his romantic dramas “Red, White & Royal Blue”, “The Idea of You” and comedy film “Bottoms”, portrays the iconic character of He-Man in “Masters of the Universe”. The actor said he was unaware of the franchise’s legacy in India, where He-Man became a childhood favorite superhero in the late 1980s.

“I didn’t know it was massive in India. Both (him and co-star Camila Mendes) of us kind of realized the magnitude of the following when getting cast in the roles, and we have to remember this is a 40-year-old piece of IP,” the actor told PTI in a virtual interview.

Directed by Travis Knight, the live-action film follows Prince Adam (Galitzine), who is drawn back to Eternia by the mystical Sword of Power only to discover his world shattered under the ruthless rule of Skeletor (Jared Leto). Actor Camila Mendes plays the role of a warrior, Teela.

Mendes said both she and Galitzine only knew a little about He-Man’s popularity and they had to study the franchise’s history once they got the parts.

“Mattel sent us both a huge box of comic books, toys and so much information at our fingertips. Then we both went and watched every single iteration of the cartoons we could, and the ‘80s live-action film. It’s so rare that you get to dive into a project that has so much love around it. So, that’s when we really started to familiarize ourselves with it,” Mendes, known for her role as Veronica Lodge in “Riverdale”, said.

Galitzine added that through his interactions with fans, he learned how eager parents are to introduce He-Man to their children, highlighting the franchise’s strong cross-generational appeal.

“There are people for whom this is their entire childhood; this is so nostalgic for them. The most exciting

thing has been talking to people who grew up with this, who are so excited to show their kids and are going to use it as something to bond with their kids over. I’ve met dads and moms who just can’t wait to share it with their kids, that’s exciting,” the actor said.

Both actors also opened up about the intense physical and emotional preparation required for the film.

Mendes started training in September 2024 before moving to London in November for a gruelling, months-long boot camp with a very specific diet and workout routine.

“I feel like Nick had to make the most sacrifices. The biggest sacrifice for me was having to be in London for seven months away from friends and family; that’s really hard. But then you make new friends while you’re there, and that becomes your new family, your work family.” The actor added that the intense physical demands of the project forced them to live like “hermits” during filming.

Galitzine said the process was “very challenging” and required them to trust the trainers guiding their transformation.

“Cami and I both like to stay in shape but this is a

completely different thing; this is body transformation. So, we had to rely on a lot of people; it was very, very scary. But it was just an act of trusting the process, and mentally, you have to kind of go there every single day and trust the people around you,” he said.

Galitzine said that he had to stay completely isolated and focused throughout filming, with no room for normal activities like eating out.

“For that whole time that you’re filming, you’re just hunkered down, super focused.” For Galitzine, another key challenge was delivering the iconic catchphrase, “I’ve the power”. He admitted he was “very nervous” and felt the emotional gravity of the line.

“I certainly felt the weight of it. For Adam, especially in our iteration, he’s a person who has just been put down his whole life, he has had to flee his home planet, and no one believes he is who he says he is. I was obviously very nervous up until filming that and was very relieved that Travis liked my interpretation.”

Also starring Alison Brie, James Purefoy and Morena Baccarin, the film comes from Amazon MGM Studios and Mattel Studios. It is set to release in theatres on June 5. (PTI)

Finland beats Switzerland 1-0 in overtime to win men's ice hockey world championship

ZURICH, June 1: Finland won the ice hockey world championship for the fifth time on Sunday, beating Switzerland 1-0 in overtime.

The Buffalo Sabres' Konsta Helenius scored the gold-winning goal 10:42 into overtime. The 20-year-old Helenius netted from the right circle, beating Switzerland goaltender Leonardo Genoni with his team's 28th shot on goal.

Finland netminder Justus Ananen shut out Switzerland with 22 saves.

"We have a strong culture, you leave your ego outside the locker room, and that's why it's so awesome to come and play for Finland," defenseman Olli Maatta said.

Finland also won in 1995, 2011, 2019 and 2022.

Switzerland wasted a two-minute, 5-on-3 advantage that started six seconds before the end of the opening period.

The final was a rematch of the two teams from their last group stage game, which the Swiss won 4-2.

That was the only loss for the Finns, who finished second in their preliminary group behind the Swiss. They went on to eliminate the Czechs 4-1 in the quarterfinals and upset tournament favorite Canada 4-2 in the semifinals.

Finland was led by captain Aleksander Barkov, who missed the entirety of the Florida Panthers' season because of a major knee injury suffered 20 minutes into his first practice of training camp. The tournament was his first action in competitive games since the Panthers won their second consecutive Stanley Cup last June.

Barkov powered the Finns with three goals and eight assists from 10 games at the world.

Swiss disappointment

After finishing runner-up in the previous two years, host Switzerland hoped for more this time in front of its home crowd in Zurich.

Home fans clapped, chanted and cheered tirelessly throughout the tournament.

"It's a huge disappointment, but, it's hockey," Switzerland forward Denis Malgin said. "It was a 0-0 game. We had our chances, and in OT it can go either way."

Switzerland failed to score a single goal in the three finals.

The Swiss lost to the Czechs 2-0 in 2024, and were defeated by the U.S. 1-0 in overtime last year. They also finished second in 2018 and 2013 when they were defeated by rival Sweden.

Switzerland also finished second back in 1935.

No medal for Canada

Norway stunned Canada 3-2 in overtime of the bronze medal game

to capture its first ice hockey world championship medal.

Noah Steen scored the winner 3:32 into overtime. The previous best result for Norway was a fourth-place finish in 1951.

In a wild ending, Canada was 2-0 down when it pulled netminder Jet Greaves. Robert Thomas then scored from the slot to reduce the deficit with 1:16 remaining in the final period with an unassisted goal.

With eight seconds to go, captain Macklin Celebrini and Ryan O'Reilly set up Thomas for his second to tie it at 2-2, forcing overtime.

Earlier, Emilio Pettersen gave Norway a 1-0 lead in the opening period and Stian Solberg added another with a deflected shot in the second. Goaltender Henrik Haukeland stopped 44 shots.

Greaves made 21 saves for Canada.

The Canadians have come up short at the worlds since they won their last and record 28th title in 2023.

They finished fourth in 2024 and were stunned 2-1 by Denmark in the quarterfinals last year.

The worlds ended in disappointment for Canada again this year despite a lineup that included teenage sensation Celebrini as captain and NHL great Sidney Crosby in addition to several established NHL stars, including O'Reilly, John Tavares and Mark Scheifele.

Canada managed to win all of its group games, including a 6-5 victory over Norway in overtime, and eliminated defending champion U.S. in the quarterfinals. But Finland, led by Barkov, proved too good in the semifinals. (AP)

Indian quartet endures miserable day at Norway Chess as all four suffer defeats

OSLO, June 1: The Indian contingent endured a miserable outing as all four players suffered defeats in Round 6, with world champion D Gukesh slipping back to losing ways after showing encouraging signs in the previous round, while R Praggnanandhaa, Divya Deshmukh and Koneru Humpy also ended on the wrong side of the results in Norway Chess here.

In stark contrast to the Indians' collective collapse, defending champion and world No. 1 Magnus Carlsen continued his resurgence, securing a classical victory to thrust himself firmly back into title contention.

The Norwegian, who had looked surprisingly vulnerable in the opening rounds, is suddenly gathering momentum at just the right time, turning what seemed an unlikely campaign into a genuine charge for the crown on home soil.

Yet Carlsen's resurgence has been overshadowed by an unexpected frontrunner. Wesley So of the United States emerged as the sole leader with four rounds remaining after dislodging Alireza Firouzja from the top, while both Carlsen and Vincent Keymer -- the tournament's early strugglers -- have launched spirited comeback bids after disastrous starts, ensuring the title race remains wide open heading into the business end of the tournament.

So surged into sole lead on 11.5 points after defeating Praggnanandhaa in a classical game and collecting the full three points, leaving the Indian stranded at the

bottom of the six-player standings on six points.

Keymer capitalised on Gukesh's (6.5 points) severe time trouble to grind out a crucial victory, taking his tally to eight points while handing the world champion another setback in the Open section.

Carlsen, meanwhile, continued his climb up the leaderboard with an authoritative classical win over Firouzja, moving to 7.5 points and fourth place.

For the second successive game, Praggnanandhaa appeared to be on course to hold, and at times even looked capable of turning the tables, but So once again demonstrated his endgame mastery, patiently converting an extra pawn into three points -- a formula that has served him remarkably well throughout the tournament.

Gukesh was under severe time pressure, a fact that Keymer acknowledged after the game, saying, "I am a pawn up, and humanly, with the time situation that we have, I actually did have very serious winning chances," underlining how the world champion was left struggling to keep the position together in a tense finish.

However, Gukesh struck a note of defiance after the match, insisting that with four rounds still to go, he remained hopeful of staging a serious comeback.

Indian women also lose

World Cup winner Divya Deshmukh (8.5 points) relinquished her grip on the top spot after a classical defeat to China's five-time world champion Ju Wenjun (8 points), slipping to second place but remaining well within striking distance of leader Bibisara Assaubayeva (9.5 points).

The Kazakh player edged further ahead after outlasting Koneru Humpy (5.5 points) in the Armageddon tie-break, following a hard-fought draw in classical play.

For Humpy, it has been a frustrating campaign, as she finds herself rooted at the bottom of the standings and struggling to find rhythm, a stark contrast to her impressive showing in the previous edition of Norway Chess.

Results after Round 6:

Open: Vincent Keymer (GER, 8) bt D Gukesh (IND, 6.5); Magnus Carlsen (NOR, 7.5) bt Alireza Firouzja (FRA, 10); Wesley So (USA, 11.5) bt R Praggnanandhaa (IND, 6).

Women: Bibisara Assaubayeva (KAZ, 9.5) bt Koneru Humpy (IND, 5.5); Divya Deshmukh (IND, 8.5) lost to Ju Wenjun (CHN, 8); Zhu Jiner (CHN, 7) bt Anna Muzychuk (UKR, 8). (PTI)

No RCB victory parade in Bengaluru as fans celebrate title win indoors

AHMEDABAD, June 1: The passionate fans will not be able to celebrate Royal Challengers Bengaluru's title defence with the team after the franchise decided against holding a victory parade in the city in order to avoid the crowd frenzy, which led to last year's deadly stampede.

The Royal Challengers lifted their second consecutive IPL title, beating Gujarat Titans by five wickets here on Sunday.

The RCB took such a decision also keeping in mind the swearing-in ceremony of newly-appointed Karnataka Chief Minister DK Shivakumar.

The function is scheduled to be held at Lok Bhavan at 4.10 pm and the Governor's residence is in close proximity to Chinnaswamy Stadium. The political function is expected to attract a massive crowd from across the state.

The ceremony, which is to be attended by several dignitaries, will also require considerable deployment of police personnel, and it will be tough for the state police department to spare men for another high-voltage function.

In that context, the RCB management felt that it was better to adhere to the police notification, prohibiting public celebrations on city streets.

On June 4, 2025, 11 fans were killed near Chinnaswamy Stadium as RCB hastily arranged a victory parade following their maiden title win, and clearly no one wanted a

repeat of that this year.

That tragic chain of events had invoked huge public outrage and the intervention of state government and judicial powers, including the High Court.

"It is highly unlikely that there will be any activities in Bengaluru. There are certain guidelines in place, and we need to stick to them," a RCB source indicated to PTI.

Bengaluru city police on Friday had issued an advisory urging the public to avoid bursting crackers, holding road celebrations, creating disturbances or engaging in fights if RCB win the IPL final.

"We have issued an advisory asking fans not to celebrate

publicly on the streets and especially not to disturb peace and security.

"We will not allow any public celebrations. If anyone wants to celebrate, they can do it indoors," Bengaluru City Police Commissioner Seemant Kumar Singh had said.

Besides, RCB top-order batter Devdutt Padikkal will have to join the Indian Test squad on Mullanpur by Wednesday ahead of the one-off Test against Afghanistan, while others like Josh Hazlewood, Tim David (Australia), Jacob Duffy (New Zealand) and Romario Shephard (West Indies) too have upcoming national team commitments. (PTI)

Technique, temperament still rule T20 cricket; Kohli proves it again: Sharma

NEW DELHI, June 1: Virat Kohli's childhood coach Rajkumar Sharma believes the batting great's IPL performance in the final was a timely reminder that technique and temperament remain as relevant as power-hitting in the shortest format.

Kohli once again delivered on the biggest stage as Royal Challengers Bengaluru defended their IPL title with a five-wicket win over Gujarat Titans in the final in Ahmedabad on Sunday, extending his remarkable run of consistency in a format increasingly dominated by ultra-aggressive batting.

Kohli struck an unbeaten 75 off 42 balls, including nine fours and three sixes, as RCB chased down GT's 155 for 8 in 18 overs.

Calling his former ward's performance "excellent" and "brilliant", Sharma said Kohli's innings offered an important lesson for young cricketers.

"That is a lesson for the youngsters to understand that it's not about power-hitting only, not about hitting sixes only. If you are good with the technique, you can always score big and that is what Virat showed today also," Sharma told PTI Videos.

"If you have good technique, good temperament... that is what he has been doing for so long for his franchise as well as for Indian cricket. He has won so many

matches for India showing this type of batting and he is an example for the youngsters to understand and learn how T20 cricket is played."

Kohli's latest title-winning effort came in a season in which he crossed the 600-run mark for the fourth consecutive year despite playing very little T20 cricket outside the IPL.

Sharma attributed that longevity to Kohli's relentless drive and match-winning mindset.

"He has been a champion player. Everybody knows the amount of matches he has won for the country and that is why everybody admires him because he is a sort of player who likes to win matches on his own and he

always keeps his team before himself.

"That is why he is the most loved cricketer in the world. He is an inspiration for all the youngsters and he has been so consistent throughout his life," he said.

With Kohli set to return to ODI cricket this month in the home series against Afghanistan, Sharma said the former India captain continues to set benchmarks through his fitness and professionalism.

"Virat Kohli has been preparing so well for himself and he has been an example. He is bringing that fitness mantra not only for the cricket community but for the whole country. (PTI)

French Open slaps Vallejo with a 65,000-euro fine over sexist umpire remarks

PARIS, June 1: Adolfo Daniel Vallejo was fined half his French Open prize money after he said his second-round match should not have been umpired by a woman, the tournament director announced on Monday. Vallejo lost to French teenager Moise Kouame last week after a tense five-set battle that lasted nearly five hours. He later told the tennis website Clay that "this sort of match needs to be umpired by a man."

Following his 6-3, 7-5, 3-6, 2-6, 7-6 (8) loss, Vallejo added: "It's very difficult for a woman to do it."

Roland Garros director Amelie Mauresmo told reporters at the French Open that a 65,000 euros (\$76,000) fine was handed down to the player, "representing roughly half of his prize money."

"This is clearly unacceptable," Mauresmo said. "Once again, such remarks have no place here." Players reaching the second round at the French Open receive 130,000 euros. Vallejo, from Paraguay, said the umpire, Ana Carvalho from Brazil, did not control the spectators.

"It has to be refereed by a man, because it's a very demanding crowd and you need a lot of strength to go against the crowd," he said. "The crowd was very out of line, but I understand they're supporting their compatriot. It's quite an intense crowd and that's why I was prepared; I already knew it would be like that and, to be honest, it didn't harm me, but rather strengthened him." (AP)

GT players, staff evacuated from team bus after mid-road breakdown

AHMEDABAD, June 1: In a safety scare for the Gujarat Titans players and support staff, they had to be evacuated from the team bus after a short circuit caused a breakdown of the vehicle while it was ferrying them back to their hotel after the IPL final loss to Royal Challenge Bengaluru here.

PTI has learned that the team members, who are all safe and unhurt despite smoke spreading inside the bus, waited on the road for a short while before another bus was arranged to take them to the hotel.

The incident added to a miserable night for GT as they had earlier gone down to Royal Challengers Bengaluru in the IPL final by five wickets here on Sunday.

It was also a continuation of their tough travel itinerary as GT had to travel from Dharamsala to Mullanpur on May 27 to play the Qualifier 2 against Rajasthan Royals on May 29.

However, their scheduled departure to Ahmedabad on May 30 was inordinately delayed because of inclement weather in Mullanpur. GT reached their home base late on Saturday evening. Was fatigue a reason for the Titans' meek surrender to RCB in the IPL final?

"I don't want to take away from the fact that RCB have won by simply stating that we've had this number of games in these short days and we're fatigued and that's not really what we're about," said Vikram Solanki, GT's Director of Cricket, in the post-match press conference.

"Admittedly, it (155/8) was a below par total but they showed great fight to try and defend it. We might make an assessment of what we might have done differently, that's a given. But I think you've got to accept that the opposition sometimes play well as well," he added. (PTI)

Aguirre puts faith in a new generation as Mexico seeks World Cup redemption

MEXICO CITY, June 1: Mexico coach Javier Aguirre opted for a new generation of players to use home ground advantage at the World Cup in a bid to seek redemption after one of the worst failures for El Tri in modern times at Qatar 2022.

"El Vasco" Aguirre, guiding the Mexican team into a World Cup for the third time, Sunday overhauled a squad that floundered in Qatar and failed to advance from the first round for the first time since 1978.

He picked 13 players who weren't part of the squad four years ago. The most intriguing of them all is 17-year-old midfielder Gilberto Mora, who could become the youngest Mexican man to appear in a World Cup.

Mexico's youngest World Cup player is Manuel "Chaquetas" Rosas, who was 18 years, 88 days when he played in the inaugural 1930 World Cup.

Brazil great Pele is among the seven players who have contested a World Cup at age 17 — the youngest of them all was Northern Ireland's Norman Whiteside in 1982 in Spain.

Depending on when Mora makes his World Cup debut — Mexico opens against South Africa on June 11 — he would become the sixth or seventh on the international all-time list for youngest players at

the tournament.

Among the veterans returning after the disappointment of Qatar 2022 is goalkeeper Guillermo Ochoa, who has been picked in a World Cup squad for the sixth time.

Although Ochoa, who made his World Cup debut in 2006, has only played in three World Cups and is currently considered the backup to starter Raúl Rangel.

After taking on South Africa at the Azteca stadium, Mexico will face South Korea in Guadalajara and close out the first round against Czechia on June 24.

Mexico, on a seven-match unbeaten streak, has one more World Cup warmup match against Serbia.

Mexico: Goalkeepers: Raúl Rangel, Guillermo Ochoa, Carlos Acevedo.

Defenders: Jesús Gallardo, Johan Vázquez, Israel Reyes, César Montes, Jorge Sánchez, Mateo Chávez.

Midfielders: Edson Álvarez, Erik Lira, Alvaro Fidalgo, Gilberto Mora, Brian Gutierrez, Luis Romo, Orbelín Pineda, Alexis Vega, Obed Vargas, Luis Chávez.

Forwards: Roberto Alvarado, Santiago Giménez, Raúl Jiménez, Julián Quiñones, Armando González, Guillermo Martínez, Cesar Huerta. (AP)

Andy Flower: The Luis Enrique of RCB, transforming team to back-to-back IPL championships

AHMEDABAD, June 1: Accolades have been pouring in for Virat Kohli, Rajat Patidar and Bhuvneshwar Kumar for helping Royal Challengers Bengaluru lift their second IPL title on the bounce, but another man might be having a soft chuckle of satisfaction in a quiet corner.

Andy Flower — the silent revolutionary who transformed RCB from history-seekers to history-makers.

When he took over the reins in August 2023, RCB were still searching for their first IPL title, leaving them a target for merciless social media trolls.

It would not be an exaggeration to think that the Royal Challengers then were the Paris St Germain of the IPL, a team thriving on Galacticos culture.

Just like the PSG, now two-time UEFA Champions League winners under Luis Enrique, the Royal Challengers too went through years of disappointment despite assembling a glittering array of stars.

Along with Kohli, they had some of the best in

T20 business such as AB de Villiers, Chris Gayle, Dale Steyn, Shane Watson, Yuvraj Singh etc.

Similar to PSG finding their Messiah in Enrique in 2023, the same year as Flower joined the Bengaluru side, RCB found theirs in the Zimbabwean — a no-nonsense cricketing brain who believes in structure and cohesion to bring in desired results.

Flower came with proven multi-level credentials, having guided England to the Ashes in 2005, a Test series win in India (2012) and the 2010 T20 World Cup.

At the club level, he had orchestrated the title wins for Multan Sultans, Gulf Giants, Trent Rockets and Maratha Arabians in various franchise leagues. It mirrored Enrique's treble-winning success with Barcelona, and ending PSG's 55-year wait for an European crown.

But for all that, Flower needed to break the set patterns in the Royal Challengers establishment.

Once he took over from Mike Hesson, Flower's concentration was to fortify RCB's bowling, yet,

the signing of Bhuvneshwar Kumar ahead of IPL 2025 for Rs 10.75 crore raised a lot of eyebrows.

But it proved a master-stroke as the veteran pacer amassed 45 wickets across two IPL seasons, leading RCB's bowling unit with aplomb.

Flower, a known supporter of young talents, worked along with mentor Dinesh Karthik, Director of Cricket Mo Bobat and a slew of scouts to rope in some young bowlers like Rasikh Salam Dhar,

Suyash Sharma, Abhinandan Singh and Mangesh Yadav. Skipper Patidar stressed on Flower's ability to work effectively with seasoned stars and upcoming talents.

"I can say I have played for four years in the IPL. He is one of the best coaches, I feel, because of the way he handles players.

"Not only players who are playing, but the players who are not playing, the new players in the team, those are playing their first IPL season, he spends a lot of time with every individual. I don't have enough words for him, but he is the best coach I have played under," gushed Patidar.

The 33-year-old offered the example of Rasikh Dhar to underline his argument.

Dhar took 19 wickets in IPL 2026 to splendidly support the lead cast of Bhuvneshwar and Josh Hazlewood.

"When we gave a chance to Dhar, he looked confident. He is very much confident about his skills, about his slower balls, back of the hands and york-

ers. I think he supported Bhuvni and Josh in IPL 2026 well. Whenever I see him, he has clarity about his role," he said.

That clarity, Patidar felt, emanates from the equal treatment of players without worrying about their pay grade.

"Definitely, I think the culture has changed. There have been a lot of changes in the mindset of the players. I think all the credit goes to the coaching staff because of the way they are handling the players.

"They know that new players are also an important part of the team, not only the experienced players. Our coaching staff is treating every player equally and that is the change I feel," he explained.

The cultural change under Flower is visible now. For years, RCB have experimented with coaches who can give them that elusive title.

When they found the right one, he brought it twice in a row to RCB headquarters in Bengaluru. (PTI)

3rd WT20I: India look for better effort from middle-order batters in series decider

TAUNTON, June 1: Indian team will expect more from the dependable duo of Deepti Sharma and Richa Ghosh as it aims to sort out its middle order woes going into the third and final women's T20 International against hosts England here on Tuesday.

With the series locked at 1-1, a victory in the decider will not just be another overseas bilateral win but a shot in the arm for either team before the start of the Women's T20 World Cup later this month.

For India, this series is also the dress rehearsals to check out the ideal combinations based on English conditions going into the marquee event.

In the first couple of games, Yastika Bhatia with a half-century and a 30 odd has by far looked the best batter. Jemimah Rodrigues also got a fifty while the elegant Smriti Mandhana and destructive Shafali Verma

got starts in the second match.

However, in both games India lost momentum towards the last five overs and the big-hitter Richa hasn't exactly fired in both games.

In the first game, fabulous batting by Bhatia and Rodrigues had ensured that India ended up with a healthy 188/7 despite only 40 runs being scored between overs 16 and 20.

In the second game, India were sitting pretty at 70 for 1 in a chase of 169 but it was an unmitigated disaster between overs 16 and 20 when they were reduced to 28 for five.

Save Richa, there aren't many six-hitters and skipper Harmanpreet, who is perhaps the cleanest aerial hitter in the team, will have to take the onus of batting till the end of 20 overs and take the total closer to 190-200, which is eight out of ten times a winning score in women's cricket.

For England also, batting has been a concern, as Amy Jones' 67 is the only half-century across two games while most of the other seasoned batters got starts but couldn't carry on with the momentum for sustained periods of time.

Teams :

India: Harmanpreet Kaur (C), Smriti Mandhana (VC), Shafali Verma, Jemimah Rodrigues, Bharti Fulmali, Deepti Sharma, Richa Ghosh (WK), Sree Charani, Yastika Bhatia (WK), Nandini Sharma, Arundhati Reddy, Renuka Thakur, Kranti Gaud, Shreyanka Patil, Radha Yadav.

England: Em Arlott, Tammy Beaumont, Lauren Bell, Alice Capsey, Charlie Dean, Sophia Dunkley, Sophie Ecclestone, Lauren Filmer, Amy Jones, Nat Sciver-Brunt, Paige Scholfield, Linsey Smith, Danni Wyatt-Hodge, Issy Wong.

Match starts at 11:00pm IST. (PTI)

Divyanshi makes history with double gold in WTT Pristina Feeder series

PRISTINA (KOSOVO), June 1: 15-year-old Divyanshi Bhowmick produced a dream performance to become the youngest Indian woman ever to win a WTT Feeder Women's Singles title here.

The young Indian star, ranked World No. 211, showcased extraordinary composure and fighting spirit to defeat Chinese Taipei's Yeh Yi-Tian, the World No. 38, in a thrilling five-game final.

After dropping the opening game, Divyanshi mounted a spirited comeback to register a memorable 3-2 (8-11, 11-8, 11-5, 7-11, 11-7) victory, announcing her arrival on the senior international stage in emphatic fashion.

The victory is not only historic for Indian table tennis but also places Divyanshi in elite company globally. At just 15 years of age, she is believed to be the second-youngest player in the world, after Japan's prodigious Miwa Harimoto, to capture a Women's Singles title on the WTT Feeder circuit.

Divyanshi's triumph was the culmination of a remarkable week in Prishtina, where she demonstrated maturity well beyond her years, overcoming higher-ranked and more experienced opponents with fearless attacking play and unwavering confidence.

Adding further sparkle to an already unforgettable campaign, Divyanshi also clinched the Women's Doubles gold medal alongside fellow Indian teenager Syndrela Das.

The talented Indian pair defeated the Japanese combination of Sachi Aoki and Cocona Muramatsu in a pulsating final that kept spectators on the edge of their seats.

After losing the opening game, the Indians fought back brilliantly to prevail 3-2 (7-11, 14-12, 12-14, 11-8, 11-7) in a contest lasting a little over 30 minutes. Their resilience under pressure, especially in the crucial closing stages, highlighted the growing maturity of one of India's most promising partnerships. (PTI)

Germany looking for World Cup redemption after successive early exits

BERLIN, June 1: The memories of two successive World Cup group-stage exits weigh heavily on the Germany team before another attempt at restoring lost pride.

Surely it couldn't happen again?

Germany, the four-time world champion, has been on a quest for redemption since its ignoble exit from the 2022 World Cup in Qatar marked a new low for the national team. Hansi Flick, the Germany coach at the time, held on for six more games before making way after three straight defeats.

Julian Nagelsmann took over in time for the 2024 European Championship and marked a new beginning with young, exciting players. Germany, the host, lost to eventual champion Spain in the quarterfinals, when Nagelsmann said there had been little lamented having to wait two years before becoming world champion.

Nagelsmann has maintained that stance and repeated it again Thursday, even if his late decision to recall veteran goalkeeper Manuel Neuer from two years of international retirement indicates a lack of conviction in Oliver Baumann, whom he'd previously indicated would be the No. 1 in goal after solid performances in qualifying.

Neuer is the only remaining member of the World Cup-winning team from 2014 in the Germany squad.

Calculated risk Nagelsmann acknowledged that Neuer's return is "a blow" for Baumann, a team player who is unlikely to grumble in public about the decision. But the 40-year-old Neuer's experience over 124 games for Germany could be a boon for the squad in what will be the goalkeeper's fifth World Cup tournament.

"Everyone knows what kind of aura he possesses and the quality he brings to a team," Nagelsmann said. "We don't have a goalkeeper problem."

Neuer is just over two years older than the 38-year-old Nagelsmann — who will be at his first World Cup.

His inclusion lifts the average age of the squad to 27.98 years, the oldest since the 2002 World Cup under Rudi Völler, Kicker magazine reported.

Neuer's teammate at Bayern Munich, Joshua Kimmich, will captain the side.

The only concerns are Neuer's recurring injuries. Neuer was to miss Bayern Munich's German Cup final against Stuttgart because of a calf injury.

Another group-stage flop unthinkable Germany's problems at the last two World Cups started with opening defeats to Mexico and Japan in Russia and Qatar, respectively.

Tournament newcomer Cu-raçao is unlikely to spring a surprise when they meet for their Group E opener in Houston on June 14. (AP)

Brisbane begins work on the 2032 Olympics main stadium at Victoria Park

BRISBANE, June 1: Protestors have been moved along and excavation machinery has been moved in as work on the main stadium for the 2032 Olympics got under way Monday, almost five years after Brisbane was awarded rights to the Summer Games.

The Games Independent Infrastructure and Coordination Authority took ownership of the inner city Victoria Park site from the Brisbane City Council at midnight, and temporary perimeter fencing was erected ahead of construction on the 3.6 billion Australian dollar (\$2.6 billion) Brisbane Olympics main stadium.

There was a heavy security presence again Monday, days after Queensland state police arrested five people and council staff began dismantling protest camp sites on the parklands.

A small group of activists was relocated from inside to outside the perimeter fencing in the parklands just after midnight.

Queensland state Premier David Crisafulli turned the first sod, and said the people had been urging his government to "get on with it."

"It's game on — we have a plan to deliver for the 2032 Games and beyond, and today, we get cracking on delivering it," he told a news conference. "Victoria Park will be the beating sport, cultural and green heart of Brisbane, and a place all Queenslanders can be proud of."

Crisafulli said he respected the rights of protestors, but not between "excavators and bulldozers."

Indigenous and environment groups have protested the construction of a major stadium in the heritage-listed park close to downtown Brisbane, saying the green space and culturally significant sites would be lost for future generations in the state capital.

Crisafulli said after construction, more than two-thirds of Victoria Park would be green public space.

Hundreds of protestors had gathered at the site on Sunday afternoon but with dozens of police at the park entrance and patrolling the

area early Monday, it was a quiet start on a cool but sunny first winter morning in Australia.

Save Victoria Park organiser Andrea Lunt told Australian Associated Press that protestors were considering their next steps.

"This space with its heritage and its history is such a special asset for Brisbane," she said. "We're not an anti-Olympics group, but we don't support the Olympics in its current form."

The International Olympic Committee last year backed the Queensland government's 2032 venue plan after several false starts, saying the Brisbane Games were "on the right path."

Football World Cup to be telecast live in India

NEW DELHI, June 1: In a big relief for the football fans in India, the 2026 FIFA World Cup will be broadcast live in the country as the world governing body and the 'Z' group on Monday reached an agreement just 10 days before the start of the showpiece on June 11.

The World Cup, to be co-hosted by the USA, Canada and Mexico, will be broadcast live on television by Zee Entertainment through their newly launched Unite8 Sports network, while live streaming will be available on Zee 5 app.

The 2026 World Cup broadcast agreement was part of a deal that covers major FIFA tournaments to audiences in India until 2034. The tournaments include 2030 World Cup to be co-hosted by Morocco, Portugal, and Spain, with special centenary celebration matches taking place in Uruguay, Argentina, and Paraguay, 2027 Women's World Cup, among others.

"FIFA and 'Z' announce agreement to bring FIFA World Cup 2026 and major FIFA tournaments to audiences in India until 2034," a joint statement said.

"The partnership will see matches and related programming distributed across 'Z's' linear television channels (UNITE8 Sports) and digital platform (Zee 5), with multi-language coverage designed to increase accessibility and fan engagement across India, including for the FIFA World Cup 2026. (PTI)

South Africa soccer body says World Cup squad will depart Monday after visa delay

JOHANNESBURG, June 1: South Africa's World Cup squad will leave for the tournament on Monday after problems with travel visas delayed their departure, the national soccer body said.

South Africa plays co-host Mexico in the opening game of the World Cup on June 11 in Mexico City. It plays one of its group games in the U.S. The South African team was due to depart Sunday but had not secured visas for the U.S. for some players and backroom staff members, the sports minister said. Sports Minister Gayton McKenzie posted on X that the "debacle" over visas was caused by an administrative error by team officials and called it embarrassing. He demanded a report from the South African Football Association.

"We are being made to look like fools," McKenzie wrote on social media. The association said Monday that it had now secured visas for all the players, though four staff members still didn't have visas. They were an assistant coach, the team doctor, the head of security and an analyst, McKenzie said. (AP)

RCB skipper Patidar dedicates IPL trophy to stampede victims

AHMEDABAD, June 1: Royal Challengers Bengaluru skipper Rajat Patidar shelved his stoic side for a few moments and dedicated his team's second IPL trophy to the fans who died in the stampede last year.

The hurriedly organised victory celebrations of RCB after they won their maiden IPL title in June last year led to a stampede, causing the death of 11 fans outside the M Chinnaswamy Stadium.

"Obviously, you feel bad. You lost your fans after winning the game. Not just the fans, they are the family members," Patidar said in the post-match press conference after RCB beat Gujarat Titans by five wickets to bag their second IPL title in a row here on Sunday night.

"I always want to dedicate this trophy to them. That's it. I don't have words to express that feeling," he added. The whole train of incidents after the tragic turn of events resulted in the Chinnaswamy Stadium getting deprived of top-flight cricket for nearly eight months.

After several rounds of discussions, inspections and renovation works, the Karnataka Government and the BCCI green lighted the return of cricket to the fabled venue. (PTI)
